RE: IYG702X and IYG703X

To whom it may concern:

SpectraLink Corporation desires to add DFS band 5.470 – 5.725 GHz to the referenced certified 802.11a,b,g wireless products.

This is only a software change. An Administrator is the only one able to access the change. The end user or normal product user is not able to access the change.

Sincerely,

A handwritten signature in cursive script, appearing to read "Bob Foster".
