Addendum to Test Report TUVR04a/Rev B (RNP2400)

- Add the following as the first sentence(s) of Section 4.2.2.3:
 - The procedures of ANSI C63.4-1992 were used to perform the measurements in this report
 - For measurements above 1,000MHz average detector was utilized with a measurement bandwidth of 1,000MHz. The peak measurements reported are less than the average limits specified and demonstrate compliance with the requirements
- General statement: The phone cannot operate off-hook while inserted in the charger
