Item 1: Because this device can be marketed to the general public and fits the definition of a Class B digital device under section 15.3 the manual should contain the statements required for a class B digital device. Please provide an updated manual reflecting the appropriate statements, i.e. 15.105 for Class B digital.

Answer: The unintentional radiator host that this intentional radiator is installed in is a very large and expensive laser printer and is considered as a Class A digital device. The physical size and cost of the printer would not allow this device to be used in a residential environment. The User's Guide already contains the Class A statements as required in 15.105a.

- 2. A revised block diagram has been uploaded.
- 3. Additional external photos have been uploaded.
- 4. A revised confidentiality letter has been uploaded.
- 5. The equipment code should be DXX.
- 6. A revised test report with the voltage variations has been uploaded..
- 7. The customer wishes to get certification to 15.209, not 15.225. According to Steve Behm, in that case, this information is not needed for 15.225.
- 8. The customer wishes to get certification to 15.209, not 15.225. According to the customer 15.215 is only required if the alternative limits in 15.225 are used.
- 9. The customer wishes to get certification to 15.209, not 15.225. According to Steve Behm, in that case, this information is not needed for 15.225.
- 10. The customer wishes to get certification to 15.209, not 15.225. According to Steve Behm, in that case, this information is not needed for 15.225.
