**Re:** Request for Limited Modular Approval

**Applicant:** Lexmark International

**FCC ID:** IYLM11003

We, Lexmark International, hereby request Limited Modular Approval for equipment certification for the referenced FCC identifier.

The RFID module will be used in multiple products having similar construction. In each of these implementations, the module is connected to the same metal frame. This is the same configuration that was used for our testing in the lab. These products will only be manufactured by Lexmark International. The RFID module will not be sold separately.

With a limited modular approval, testing of the final products utilizing the RFID module will be conducted to ensure compliance to the FCC Part 15 Rules.

A handwritten signature in cursive script that reads "Michael S. Klave".
