Re: FCC ID IYLN2050, Request for Class II Permissive Change

To whom it may concern,

The purpose of this letter is to request a Class II permissive change to our current FCC approval for an 802.11b/g wireless network card that will be used in various printing products. There have been additional cards added to the line that all contain the same radio. The changes that have been made do not affect the testing that was done to approve this radio. There is also an update to the naming conventions that are used for these wireless cards. The various models are shown below. All models are covered by the Regulatory type/model number LEX-M01-001.

Lexmark 2000 Series Wireless Products

Brand	Trade Name, (Product ID)	Product Variance
Lexmark	N2060 (2010-012)	Base Product
Lexmark	N2052 (2010-011)	Ethernet Port Removed
Lexmark	N2050 (2010-001)	Ethernet Port Removed, Possible reduction of memory.

Dell 1000 Series Wireless Products

Brand	Trade Name, (Product ID)	Product Variance
Dell	1150 (1150)	Same as Lexmark N2060
Dell	1000 ¹ (1000 ²)	Same as Lexmark N2050

¹ Same Wireless Card as the Lexmark N2050
¹ Same Wireless Card as the Lexmark 2010-001

Regards,

Michael Klave
