1 Differences between both variants

1.1 Mechanical

Mode instead of Menu

Mute instead of Enter

Volume with rotating disk instead of buttons

Skip Buttons are the same

Figure 1: FFB-Variant 1

Figure 2: FFB-Variant 2

1.2 Electrical

1.2.1 RF Parameter

Both Variants have the same RF Transmitter (same Tx Power) and both antennas have the same design and are tuned to the same frequency.

1.2.2 Assembly

Basically has variant 1 (see figure 1) the same basic function/ electrical parameters as variant 2 (see figure 2) plus other functionalities (Buttons) i.e. variant 2 has:

- Less Buttons
- Less lighting LED's,
- Less parts (due to the few number of LED's, buttons....)
- No left / right switching
- Translation of test points
- Partially reduced / changed conductor path
- Partially reduced / changed electronic components

1.3 Software

In general the change is done just to adapt the software to the new application (Buttons, Long/ short push, service, battery voltage measurement....)
