

Annex no. 11

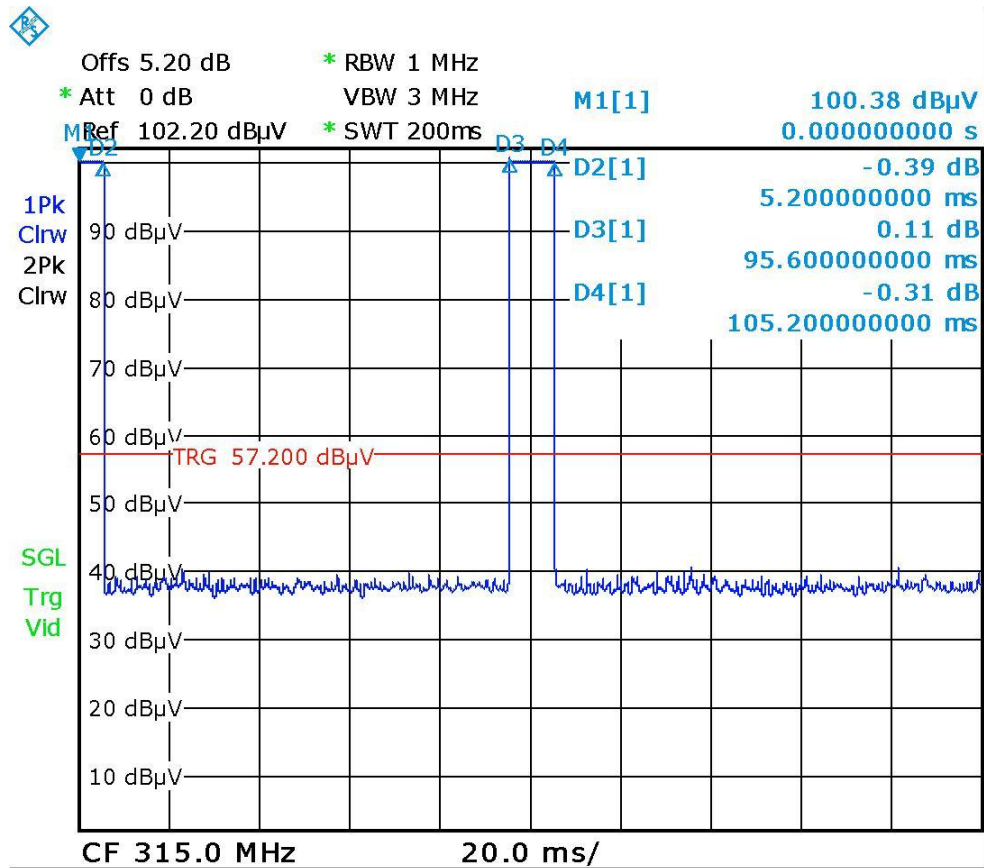

Periodic Operation Characteristics

Total transmission time after manual activation (via door handle)(worst case)

(without respond of the car key)

(with respond of the car key, worst case)

Worst case transmission time in a 100 ms periode:
 message block 1: 5.2 ms
 message block 2: 9.6 ms
 total transmission time: 14.8 ms

Averaging correction factor:
 $20\log(TX_{on}/100ms) = 20\log(51ms/100ms) = -16.6\text{ dB}$
