

FCC ID: J3E06MW-TALL
OPERATIONAL DESCRIPTION

The Mu-Wave Transmitter is a fixed transmitter used as part of several industrial measuring devices (including micrometers, calipers and indicators) sold by Mitutoyo. The transmitter is used to send data from a measuring device's gauge to a corresponding Mitutoyo receiver. The data is then transferred to a client's data acquisition system. The transmitter is activated after pressing the send button at the bottom of the transmitter. Data is sent no more than once every ten seconds. The transmitter transmits at 285.125 MHZ +/- -2MHz.
