Good morning Tim

Thank you for responding so quickly.

- 1) FRN Number is 0007-2511-92
- 2) The units with the wires/ferrite have this option. 99% of units are shipped without this option but units with the wires, have this installed at the factory and are equipped at that time with the ferrite. This is not a user installed option.
- 3) The unit was tested with the wire/ferrite option as this was determined to be worse case.
- 4) I have uploaded photos showing label location for all units. I apologize for the photo quality but are for location reference only.
- 5) Thanks for the info.

Thanks again for the speedy response.
