

## PARTS LIST ADDENDUM

Most of the electronic parts used in the construction of this call box family are on the schematic. The keypads are part of the chassis assembly so are not on the schematic.

The ferrite beads that are used on the cables that attach to the relay contact sense inputs are part of the top assembly for the callbox, when it is used for contact sensing. Since each installation is unique to the particular store, these top drawings are generated when needed.

The following is a list of these parts.

Keypads. The following are the keypads used on each member of the GENCLBX Family of callboxes.

CB511 – 150001-04

CB475 – 150001-04

CB440 – 230377-00

CB514 – 230505-00

Ferrite Beads. The following are the ferrite beads used on the contact closure sensing inputs for each member of the family.

CB511 – 111017-00

CB514 – 111017-00

CB440 – 111017-01

CB475 – 111017-00
