RE: ATCB005809

FCC ID: J75503B for Sunrex Technology Corporation

I have a few comments on this Application. Depending on your responses, kindly understand there may be additional comments.

1. This application is missing an operational description as required by Section 2.1033(b)(4) of the FCC Rules. This exhibit is required by the FCC Website when uploading information for a grant of Certification. Please provide one that gives a brief description of the circuit functions of the device along with a statement describing how the device operates. This statement should contain a description of the ground system and antenna, if any, used with the device.

2. Please provide a complete user manual for this device. The one provided appears to be incomplete since it doesn't contain instructions on how to change or select the channel on a device that operates on 5 different channels. And how is this transmitter activated with the associated receiver?

3. (a) Please provide a new FCC ID label exhibit that contains the compliance statement from Section 15.19(a)(3) on it. Paragraph 5 of this rule section only permits this statement to be placed into the user manual when the device is too small for the statement. FCC policy requires a device to be smaller than the palm of your hand before the compliance statement can be placed in the user manual. Accordingly, the following statement must be added to the FCC ID label: "This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation."

    (b) The logo for Declaration of Conformity (DoC) must be removed from the FCC ID label for the keyboard. The keyboard is not considered a Personal Computer (PC) peripheral since it does not connect to a PC computer by wires. Unless you can provide me with another reason for having the DoC logo on the keyboard, please remove the DoC logo from the keyboard.

4. Allen Lin is listed as the contact person for Sunrex Technology Corporation on the FCC Grantee Code Database. As such, he is the authorized person to sign the agent letter for Sunrex. Unfortunately Steven Chen has signed the agent letter submitted with this application. Please either provide a letter from Allen Lin giving Steven Chen the authority to sign the agent letter for Sunrex on this application or submit a new agent letter signed by Allen Lin for this application.

5. For Your Information – I note that you have not requested confidentiality for any of the exhibits submitted with this application for Certification. Once the grant of Certification is issued, these exhibits will be publicly available to anyone worldwide simply by logging into the FCC database and your application. To protect your documents from being copied, I strongly urge you or your client to submit a request for confidentiality on the schematic diagram and the operational description for this device. As long as the letter is signed as indicated in item 4 above, it will not hold up the application.

Richard Fabina

Examining Engineer

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
