RE: Ad Hoc Attestation for FCC ID: **J9C-65VE239P2**

Please be advised that as a Microsoft Windows client, the 65-VE239-P2 PCIe minicard and drivers which are distributed only in binary form by Qualcomm to authorized ODMs/OEMs as well as distributed by Qualcomm with 65-VE239-P2 samples, support Ad Hoc (IBSS) within those countries governed by FCC regulatory statues on only those non-DFS (Dynamic Frequency Selection) bounded channels allowable by FCC statues.

Sincerely,

Fang Han
