RE: Ad Hoc Attestation for FCC ID: **J9C-65VF438P2**

Please be advised that as a Microsoft Windows client, the 65-VF438-P2 USB stick and drivers which are distributed only in binary form by QUALCOMM to authorized ODMs/OEMs as well as distributed by QUALCOMM with 65-VF438-P2 samples, support Ad Hoc (IBSS) within those countries governed by FCC regulatory statues on only those non-DFS (Dynamic Frequency Selection) bounded channels allowable by FCC statues.

Sincerely,

Paul Guckian
VP, Engineering, Regulatory Group
QUALCOMM Inc.
