RE: Ad Hoc Attestation for FCC ID: J9C-EC544D1

Please be advised that as a Linux client, the 65-VP672-P1 Ethernet Daughter Card for 2.4/5GHz Client Applications and drivers which are distributed only in binary form by QUALCOMM to authorized ODMs/OEMs as well as distributed by QUALCOMM with 65-VP672-P1 samples, support Ad Hoc (IBSS) within those countries governed by FCC regulatory statues on only those non-DFS (Dynamic Frequency Selection) bounded channels allowable by FCC statues.

Best Regards,

Paul Guckian Vice President, Engineering Qualcomm Incorporated September 24, 2009
