Subject: FCC Class II Permissive Change for FCC ID: J9CGOBI2000-H (Original Grant Date: April 6, 2009), Applicant: Qualcomm Inc.

Dear Sirs:

In cooperation with our supplier, Qualcomm, we request authorization for a Class II Permissive Change to their FCC grant for the Gobi2000 Mini-PCIe wireless WAN card.

There are no modifications made to the modular transmitter itself.

This request covers the use of the radio module in our HSTNN-I82C computer. In order to be sure that our product complies with the FCC requirements we have:

- Included an attractive, protective case with each computer
- Included a label on the back of the computer instructing the user to always use the case
- Provided the user with detailed instructions on the installation and use of the case, as well as the importance of using the case

Details are in the accompanying materials.

If you have any comments or questions, please feel free to contact me.

Sincerely,

A handwritten signature in black ink that reads "Walter Overcash".

Walter Overcash

cc: John Forrester, Qualcomm
