

Measurement Requirements (CFR 47 Part 25, Paragraph 25.202)

The measurements which follow were performed by TÜV Product Service. To the best of my knowledge these tests were conducted in accordance with the procedures outlined in Part 2 of the Commission's Rules and Regulations. The data presented below demonstrates compliance with the appropriate technical standards.

A handwritten signature in black ink that reads 'FR Fleury'.

Floyd R. Fleury
EMC Manager

Exhibit 3 Attestation Statement

The equipment, QUALCOMM model Remote Analog Fixed Phone, is a satellite communications user terminal designed to operate under the requirements of FCC CFR47 Part 25. The product is designed to operate at a granted level of 4.17 Watts E.I.R.P. (2.53 Watts ERP)

The equipment complies with uncontrolled RF exposure environment requirement by the IEEE STD C95.1. and FCC OET Bulletin 65, Edition 97-01 August 1997.

The data, data evaluation and equipment configuration represented herein for equipment certification are a true and accurate representation of the measurements of the sample's radio frequency interference emissions characteristics as of the dates and at the times of the test under the conditions herein specified. This applies to all tests that do not require an Open Area Test Site (OATS) to perform. TUV Product Services performed tests that required an OATS site.

Equipment Tested: GSP-2400RA Globalstar Remote Analog Fixed User Terminal (RAFUT)

Part 25 References: 25.202 Frequency Stability
25.202 Emissions Limits

Part Number: 10-81390-1

Series Number: N1074FB3W

Dates of Test: May 25, 2001, May 26, 2001

Test Performed by: John Forrester, Senior Engineer

Senior EMC/Regulator Engineer

Qualcomm Incorporated
