

## **Exhibit 3 Attestation Statement**

The equipment, QUALCOMM model Globalstar K2 User Terminal (UT), is a satellite communications user terminal designed to operate under the requirements of FCC CFR47 Part 25. The product is designed to operate at a granted level of 2.5 Watts E.I.R.P. (1.53 Watts ERP).

The equipment complies with uncontrolled RF exposure environment requirement by the IEEE STD C95.1 and FCC OET Bulletin 65, Edition 97-01 August 1997.

The data, data evaluation and equipment configuration represented herein for equipment certification are a true and accurate representation of the measurements of the sample's radio frequency interference emissions characteristics as of the dates and at the times of the test under the conditions herein specified. This applies to all tests that do not require an Open Area Test Site (OATS) to perform. Nemko USA performed tests that required an OATS site.

Equipment Tested:                   GSP-1720 Globalstar K2 SDVM  
Part 25 References:   25.202 Frequency Stability  
  25.202 Emissions Limits  
Part Number:                        20-C6493-1  
Serial Number:                      N10D6XC3X  
Dates of Test:                       November 15, 2006 to December19, 2006  
Test Performed by:  
Paul Jayne  
Senior EMC/Regulatory Engineer  
Qualcomm Incorporated
