Dear Thu Chan and Claire Hoque,

You are listed as the Technical Contact for the above referenced TCB application. The following item(s) need(s) to be resolved before the review can be continued:

1. This device connects to a computer via USB cable, making it a Computer Peripheral per FCC definition. Computer Peripherals require either FCC Declaration (DoC) or Certification. There is no FCC logo on the label for DoC, and there is no Certification application submitted for the Computer Peripheral (equipment class JBP) portion.
<answer>The USB connector is only used for test purposes and provisioning the device in the manufacturing factory.
The USB connector has no consumer applications and has a plastic cover over it.

2. There are 2 exhibits submitted for Tune Up Procedure and Emission Designator, which were extracted from the Confidential Operational Description exhibit, but are not themselves listed as confidential. The Emission Designator exhibit can be removed as a separate exhibit since the information is in the Operational Description exhibit. The Tune Up Procedure exhibit can be included on the Confidentiality request list. Please confirm if you wish to remove the Emission Designator separate exhibit and update the Confidentiality request letter as needed.
<answer>pls remove Emission Designator from this filing.
attached pls find revised confi. letter to include Tune Up Procedure.

3. The Nemko Radiated Test report documents ANSI C63.4 as the measurement procedure, but mentions the substitution method. The FCC requires that the Radiated emissions of licensed device be performed in accordance with the measurement methods of TIA/EIA 603B (or C). Please confirm that the radiated measurements were performed in accordance with

the measurement methods of TIA/EIA 603, and update the test report to document the procedure and method used.

<answer>report is revised.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of the original e-mail date may result in application dismissal and forfeiture of the filing fee. Also, please note that partial responses increase processing time and should not be submitted. Any questions about the content of this correspondence should be directed to the e-mail address listed below the name of the sender.

Best regards,

Chris Harvey
