Re: Status of FCC ID J9CTUTT-800, CN: EA96088

This letter is to inquire the status of the above application for FCC certification that we filed in November 1999. We are now entering the production and market phase for this product. In our understanding, without getting FCC Grant, we could not ship this product to our customer and any delay in shipment would significant affect our business. So FCC's early grant would be very important to our planned entrance to U.S. and overseas markets.

Our product is primarily composed of a control board. This board controls transmission from a phone module made by Standard Communications. This phone module already has a FCC Grant (FCC ID APV0896). Our integration of the phone module into the control board does not change and degrade any RF feature of the phone module according our test.

If you need further supporting information regarding this product, please let me know. We appreciate you taking time on this application and look forward to your early grant.

Sincerely,

Fang Han
Regulatory Engineer
