MS2007 Remote Transceiver

The Ungo MS2007 comes with a multi-function LCD Remote Transceiver featuring two-way communication with the vehicle. Each time a remote button is pressed, the LED will flash and the remote will beep to indicate that a transmission is taking place. If the remote is within two-way communication range, the LCD will display the status of the system. The remote is also equipped with a built-in chime that will play a tune as confirmation of some features such as remote starting, clock setting, etc.

Button 1 Arms and Disarms the system. This button also activates the system's Panic feature.

Button 2 Activates the system's Remote Start feature.

Button 3 Activates the system's Auxiliary Function, commonly used for trunk release.*

Button 4 Confirms the system's status. This button also activates the LCD backlight for night time use.
