RE: Well Communication Corp

FCC ID: JCHAWR-8210

I have a few comments on this Application.

- 1.) The front view of the External Photographs is very fuzzy. Kindly supply a clearer photograph.
- 2.) No Confidentiality Request letter was uploaded with this Application. This is so unusual that it deserves my double checking to be sure that it is okay for all Exhibits, including Schematics, Block Diagram, Operational Description and Parts List to be viewed at the FCC website. Please confirm.
- 3.) FYI: For all Unlicensed Part 15 devices it is not necessary to upload the Parts List with the Application.
- 4.) FYI: The FCC now prefers that for RF category "Mobile" devices, the power density "S" be calculated at 20cm, and not the estimated safe separation "R". Please review your RF Exposure exhibit.
- 5.) FYI: The hardcopy plots of band edge emissions on pp. 39 and 40 of the Test Report do not show any RBW or VBW or sweep time information. It is helpful if this information is included on all plots.

William H. Graff  
President and Examining Engineer

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
