RE: Giga-Byte Technology Co., Ltd.

FCC ID: JCK-GN-WLBZ101

After a review of the submitted information, I have a few comments on the above referenced Application.

General

- 1) Please provide a higher resolution exhibit for the labeling. The FCC ID can not be clearly read.
- 2) Given this is a USB "pen" style device, a 20 cm separation distance is not applicable. Please remove reference to this in the Operational Description Exhibit.
- 3) Test configuration photographs appear to only show the EUT positioned in a Horizontal Plane. Since the device incorporates a swivel type of base, please confirm that TX antenna for the device was checked while positioned in both a Horizontal and Vertical position for worse case positioning. There is concern with the EUT positioned in the Horizontal Plane, that the major radiation pattern may have been in the z-axis.
- 4) FYI, because 20 cm is not an applicable distance for this type of device, the MPE exhibit provided was not reviewed.

SAR

- 5) The Dipole calibration certificate appears more than 1 year old. Was the most recent calibration certificate included. Please explain.
- 6) Please provide a Z-axis scan for the worse case result.

Timothy R. Johnson
Examining Engineer
