RE: Martec Access Products Inc.

FCC ID: JCQ-HHTX

The following is in response to the comments made on the above referenced application.

1) Due to various concerns recently seen about proper authority being given to others for FCC and/or IC matters, the agency letter (and ideally confidentiality letters as well) should be signed by someone traceable to have the proper authority. For instance, the FCC site shows Geoffrey Engelstein as the correct contact of authority for FCC matters. Therefore the agency letters should be signed by this contact or alternatively a letter showing who he has “deputized” (i.e. Bill Gagliardo) to sign on his behalf may be provided as well.

Updated letters have been provided and the FCC database has been updated to match.

2) Please confirm that the slide switches do not transmit data when set at various settings and that they only affect the data transmitted by the push buttons. (i.e. slide switches should not themselves be capable of transmission otherwise they would not be considered manual or automatic activation because they cannot stop transmitting).

The slide switches are used to set control bits in the transmitted commands. Commands are sent only by manual activation of the pushbuttons.
