Hi, Helen.

Attached is the revised report for question 2-4. Will send operational description later.

Best regards,

Wei

Subject: Invent-tech Enterprise Ltd., FCC ID: JGFDB016RX, Assessment NO.: AN04T4285, Notice#2

Question #1: Please provide Operational Description to brief describe the circuit functions of the device along with a statement describing how the device operates.

Question #2: Based upon FCC15.215(c). "Intentional radiators operating under the alternative provisions to the general emission limits, as contained in §§ 15.217 through 15.257 and in Subpart E of this part, must be designed to ensure that the 20 dB bandwidth of the emission is contained within the frequency band designated in the rule section under which the equipment is operated." But the bandwidth plot provided in the test report shows the device does not comply with the requirement. Please explain.

Question #3: The user manual does not contain user information as required by FCC 15.21.

Question #4: Please provide external photos of AC/DC adaptor to show whether any special accessories (i.e. ferrite core) is used.

Best regards,

Helen Zhao

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of the original e-mail date may result in application dismissal and forfeiture of the filing fee. Also, please note that partial responses increase processing time and should not be submitted. Any questions about the content of this correspondence should be directed to the e-mail address listed below the name of the sender.
