Re: FCC ID: JHP10859A
Applicant: Perfect Toys International Co., Ltd.
Correspondence Ref No: 15500
731 Confirmation Number: EA97944
Date of FCC E-Mail: 08/09/00
Type Product: 27 MHz Remote Control Toy Car Transmitter (DXX)

Dear Diane Poole:

Please be advised the past provided test report page for Part 3.7.2 Fundamental Emissions was performed using Quasi-Peak values and then substrate Average factor because the carrier transmission contained pulse modulation. The provided test results showed an emission safety margin greater than 29 dB.

Regarding harmonic emissions, attached find plotted graph results performed over the 30~1000 MHz frequency band and tabular average value test results performed up to the 6th harmonic. Emissions above the 162.88 MHz range were too low to report.

Sincerely yours,

Richard Mullen
