RE: SMC Networks, Inc.

FCC ID: JI5SMC2335W

After a review of the submitted information, I have a few comments on the above referenced Application.

- 1) This application is for SMC Networks, while the external photographs state Winston NeWeb. Please explain.
- 2) The operational description & Section 6 of the RF Exposure Exhibit explain the device is to be used with 2.5 cm spacing. The device may be used as a general purpose PCMCIA card in a variety of devices including laptops & PDA's, etc. (some of these devices may be used in the lap or while on the body). Therefore touch position IS considered applicable and the device must be subject to portable exposure conditions (2.5 cm separation distance is NOT considered applicable). Please correct these exhibits as appropriate.
- 3) Please explain if this device is designed for simultaneous transmit in both bands of operation or not.
- 4) FYI, Note 6 on page 60 was applied to the fundamental in the second table which is not applicable. Additionally, 5262 is not a restricted band.

Timothy R. Johnson
Examining Engineer
