Re: Class 2 permissive change  
    Add frequency ranges: 932-932.5/941-941.5/952-960 MHz

Applicant: Alligator Communications  
Equipment: Part 101 MAS Transceiver  
FCC ID: JIL2888  
Original grant date: 3/21/2006  
Original frequency range: 928-929 MHz

To whom it my concern,

Alligator Communications would like to add the other MAS frequency ranges to the referenced product. No changes are required to product hardware, new frequency operation is made possible by simple re-tuning of the transceiver. Test report, test set-up photographs, and a list of frequencies, output powers, and emission designators is included in the submission.

If you have questions or need further information, please contact the undersigned.

Sincerely,

THOMAS N. COKENIAS  
EMC Consultant/Agent for Alligator Communications Inc.
