Compliance info 05U3274-1 REV B  
User Manual(re... FCC FINAL REPO...

Hi Helen,

Here are the answers.

Question #1: Neither "Regulatory Information" nor "User manual" includes compliance statement as specified in FCC15.19, user information in FCC15.21 and RF exposure statement in FCC 15.247(i). The possible RF Exposure statement for this device could be: "The antenna(s) used for this transmitter must not be co-located or operating in conjunction with any other antenna or transmitter. " Please revise the exhibit(s) accordingly.  
<answer>pls see revised Compliance info User Manual.

Question #2: This device is considered as a portable device, due to the low power output, it is exempted from the SAR evaluation. The test report, however, includes MPE calculation, which is not applicable to portable devices. Please remove MPE calculation from the test report.  
<answer>test report is revised.

Question #3: This device uses the same CYPRESS chip CYWUSB6934-48LFC as both the associated wireless keyboard (proposed FCC ID: JJ4-AS00900), and USB receiver (proposed FCC ID: JJ4-AS00764) do. But the high channel indicated on the test report is 2478MHz, while that on the rest of two reports is 2479MHz, please explain.  
<answer>additional test was performed for 2479MHz channel, test report is revised.

Revised IC report is saved in AN05I1360.

Thanks,

Claire
