RE: On Track innovations Ltd.

FCC ID: JNX-OTI-EFSC

After a review of the submitted information, I have a few comments on the above referenced Application.

- 1) The TX board appears to contain an SMA connector. If so, this device does not appear to be in compliance with 15.203. The test report cites permanently connected, but photographs, schematics show otherwise. Please explain/review/correct as necessary.
- 2) This device appears to incorporate a standard antenna connection. To meet the requirements of 15.203 using a standard connector, this device must be limited to Professional Installation only. This requires a cover letter requesting and justifying how the applicant ensures professional installation to be provided. The letter should address the following 3 items:
 - a) Marketing example:
The device cannot be sold retail, to the general public or by mail order. It must be sold to dealers or have strict marketing control.
 - b) Requires professional installation;
examples:
- installation must be controlled.
- installed by licensed professionals (EUT sold to dealer who hire installers)
- installation requires special training (special programming, access to keypad, field strength measurements made) What is unique, sophisticated, complex, or specialized about your equipment which REQUIRES it to be installed by a professional installer?
 - c) Application example:
-The intended use is generally not for the general public. It is generally for industry/commercial use.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
