

• According to “784748 D01 Labelling Part 15 &18 Guidelines v08” *If the device is unquestionably too small for the FCC ID to be readable (smaller than 4-6 points), the FCC ID may be placed in the user manual. However, it must be determined that the device itself is too small – the label area allocated to the FCC ID may not be reduced because of over crowded identification of other product and regulatory information. Justification for placing the FCC ID in the manual must be submitted with the initial application for certification for review and approval.*

- The mechanical is the rounded/ radius design, and there is no space to place in the FCC ID.
- No labels are used since etching or labels cannot be tolerated next to skin.
- Logitech confirm FCC ID would be place in the Charger Box of Earphone.
