

# FCC Certification Test Report

Report No.: FC171031E01

Test Model: M-R0072

Received Date: Oct. 31, 2017

Test Date: Nov. 01 to 02, 2017

Issued Date: Nov. 10, 2017

Applicant: LOGITECH FAR EAST LTD.

Address: #2 Creation Rd. 4, Science-Based Ind. Park Hsinchu Taiwan, R.O.C.

- **Issued By:** Bureau Veritas Consumer Products Services (H.K.) Ltd., Taoyuan Branch Hsin Chu Laboratory
- Lab Address: E-2, No.1, Li Hsin 1st Road, Hsinchu Science Park, Hsinchu City 300, Taiwan R.O.C.
- **Test Location (1):** E-2, No.1, Li Hsin 1st Road, Hsinchu Science Park, Hsinchu City 300, Taiwan R.O.C.
- **Test Location (2):** No. 49, Ln. 206, Wende Rd., Shangshan Tsuen, Chiung Lin Hsiang, Hsin Chu Hsien 307, Taiwan R.O.C.

This report is for your exclusive use. Any copying or replication of this report to or for any other person or entity, or use of our name or trademark, is permitted only with our prior written permission. This report sets forth our findings solely with respect to the test samples identified herein. The results set forth in this report are not indicative or representative of the quality or characteristics of the lot from which a test sample was taken or any similar or identical product unless specifically and expressly noted. Our report includes all of the tests requested by you and the results thereof based upon the information that you provided to us. You have 60 days from date of issuance of this report to notify us of any material error or omission caused by our negligence, provided, however, that such notice shall be in writing and shall specifically address the issue you wish to raise. A failure to raise such issue within the prescribed time shall constitute your unqualified acceptance of the completeness of this report, the tests conducted and the correctness of the report contents. Unless specification, the uncertainty of measurement has been explicitly taken into account to declare the compliance or non-compliance to the specification. The report must not be used by the client to claim product certification, approval, or endorsement by TAF or any government agencies.

#### 1 Certificate of Conformity

| Product:       | 2.4GHz Cordless Mouse                  |  |  |
|----------------|--|--|--|
| Brand:         | Logicool                               |  |  |
| Test Model:    | M-R0072                                |  |  |
| Sample Status: | ENGINEERING SAMPLE                     |  |  |
| Applicant:     | LOGITECH FAR EAST LTD.                 |  |  |
| Test Date:     | Nov. 01 to 02, 2017                    |  |  |
| Standards:     | 47 CFR FCC Part 15, Subpart B, Class B |  |  |
|                | ICES-003:2016 Issue 6, Class B         |  |  |
|                | ANSI C63.4:2014                        |  |  |
|                |  |  |  |

The above equipment has been tested by **Bureau Veritas Consumer Products Services (H.K.) Ltd., Taoyuan Branch**, and found compliance with the requirement of the above standards. The test record, data evaluation & Equipment Under Test (EUT) configurations represented herein are true and accurate accounts of the measurements of the sample's EMC characteristics under the conditions specified in this report.

|               |                       |         |               |   |
|               |                       |         |               |   |

## 2 Summary of Test Results

## 47 CFR FCC Part 15: 2015, Subpart B , Class B/ ICES-003:2016 Issue 6, Class

#### ANSI C63.4:2014

| ANSI 063.4.   | ANSI C63.4.2014    |                                      |   |         |  |  |  |  |
|---------------|--------------------|--------------------------------------|---|---------|--|--|--|--|
| FCC<br>Clause | ICES-003<br>Clause | Test Item                            | Result/Remarks  | Verdict |  |  |  |  |
| 15.107        | 6.1                | AC Power Line Conducted<br>Emissions | Not applicable, because the port is absent in the EUT     | N/A     |  |  |  |  |
| 6.2.1         |                    | Radiated Emissions up to 1<br>GHz    | Minimum passing Class B margin is -5.55 dB at 139.37 MHz  | Pass    |  |  |  |  |
| 15.109        | 6.2.2              |                                      | Minimum passing Class B margin is -7.05 dB at 7132.32 MHz | Pass    |  |  |  |  |

Note: There is no deviation to the applied test methods and requirements covered by the scope of this report.

#### 2.1 Measurement Uncertainty

Where relevant, the following measurement uncertainty levels have been estimated for tests performed on the EUT:

The listed uncertainties are the worst case uncertainty for the entire range of measurement. Please note that the uncertainty values are provided for informational purposes only and are not used in determining the PASS/FAIL results.

| Measurement                        | Frequency      | Expanded Uncertainty<br>(k=2) (±) |
|------------------------------------|----------------|-----------------------------------|
| Conducted Emissions at mains ports | 150kHz ~ 30MHz | 1.84 dB                           |
| Radiated Emissions up to 1 GHz     | 30MHz ~ 1GHz   | 3.91 dB                           |
| Dedicted Emissions above 1 CHz     | 1GHz ~ 6GHz    | 4.73 dB                           |
| Radiated Emissions above 1 GHz     | 6GHz ~ 18GHz   | 5.24 dB                           |

# 2.2 Modification Record

There were no modifications required for compliance.

# 3 General Information

# 3.1 Features of EUT

The tests reported herein were performed according to the method specified by LOGITECH FAR EAST LTD. for detailed feature description, please refer to the manufacturer's specifications or user's manual.

## 3.2 General Description of EUT

| Product             | 2.4GHz Cordless Mouse                                    |
|---------------------|--|
| Brand               | Logicool   |
| Test Model          | M-R0072  |
| Status of EUT       | ENGINEERING SAMPLE                                       |
| Power Supply Rating | DC 1.5V from battery                                     |
| Accessory Device    | 2.4GHz Transceiver x 1 (Brand: Logitech, Model: C-U0010) |
| Data Cable Supplied | NA   |

Note:

1. The EUT may have a lot of colors for marketing requirement.

2. The antennas provided to the EUT, please refer to the following table:

| Antenna Gain (dBi) | Frequency<br>range(MHz) | Antenna Type        | Connecter Type | Cable Length |
|--------------------|-------------------------|---------------------|----------------|--------------|
| 1.77               | 2.4~2.4835              | PCB printed Antenna | NA             | NA           |

3. The above EUT information is declared by manufacturer and for more detailed features description, please refer to the manufacturer's specifications or user's manual.

# 3.3 Operating Modes of EUT and Determination of Worst Case Operating Mode

Test mode is presented in the report as below.

| Mode | Test Condition |  |
|------|----------------|--|
| 1    | Normal Mode    |  |

#### 3.4 Test Program Used and Operation Descriptions

- 1. Turn on the power of all equipment.
- 2. Set the EUT under typical use condition.
- 3. Support unit A (PC) runs" EMC test.exe" then sends "H" messages to support unit C (Monitor).

## 3.5 Primary Clock Frequencies of Internal Source

The EUT is Bluetooth device, provided by LOGITECH FAR EAST LTD., for detailed internal source, please refer to the manufacturer's specifications.

## 3.6 Miscellaneous

#### Labelling Requirements for Part 15 Devices:

#### Verification

The specific labelling requirements for a device subject to the Verification procedure are contained in Section 15.19(a). These labelling requirements are:

If the device is subject only to Verification, include a label bearing a unique identifier (Section 2.954) and one of three compliance statements specified in Section 15.19(a). If the labeling area for the device is so small, and/or it is not practical to place the compliance statement on the device, then the statement can be placed in the user manual or product packaging (Section 15.19(a)(5)). However, the device must still be labelled with the unique identifier (Verification). Generally, devices smaller than the palm of the hand are considered too small for the compliance statement.

#### Certification

If the device is subject to Certification: (1) Section 2.925 contains information on identification of the equipment; (2) include a label bearing an FCC Identifier (FCC ID) (Section 2.926) and (3) include the appropriate compliance statement in Section 15.19(a). If the device is considered too small and therefore it is impractical (smaller than the palm of the hand) to display the compliance statement, then the statement may be placed in the user manual or product packaging. However, the device must still be labelled with the FCC ID. If the device is unquestionably too small for the FCC ID to be readable (smaller than 4-6 points), the FCC ID may be placed in the user manual. However, it must be determined that the device itself is too small – the label area allocated to the FCC ID may not be reduced because of over crowded identification of other product and regulatory information.

An electronic display of the FCC ID (see 9. Electronic Labelling below) may be used for Certification of Section 15.212 modular transmitters and software defined radios (Section 2.944).

Declaration of Conformity (DoC):

The labelling requirements for a device subject to the DoC procedure are specified in Section 15.19(b). The label should include the FCC logo along with the Trade Name and Model Number, which satisfies the unique identifier requirement of Section 2.1074 if it represents the identical equipment tested for DoC compliance. For personal computers assembled from authorized components, the following additional text must also be included: "Assembled from tested components," "Complete system not tested." When the device is so small and/or when it is not practical to place the required additional text on the device, the text may be placed in the user manual or pamphlet supplied to the user. However, the FCC logo, Trade Name, and Model Number must still be displayed on the device (Section 15.19(b)(3)).

Part 15 Declaration of Conformity (DoC) Label Examples

Equipment certified as software defined radio may use a means that readily displays the FCC ID on an electronic display screen, instead of labelling the device (Section 2.925 (e)).

Further information may refer to FCC KDB:784748 D01 Labelling Part 15 &18 Guidelines

Labelling Requirements for ICES-003 Devices:

Industry Canada ICES-003 Compliance Label:

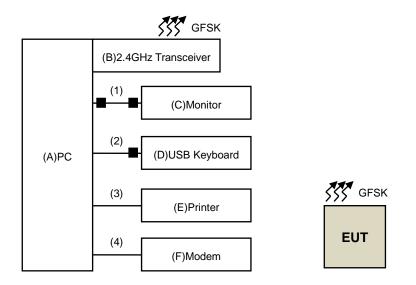

CAN ICES-3 (\*)/NMB-3(\*)

\* Insert either "A" or "B" but not both to identify the applicable Class of ITE.

## 4 Configuration and Connections with EUT

# 4.1 Connection Diagram of EUT and Peripheral Devices

## 4.2 Configuration of Peripheral Devices and Cable Connections

| ID | Product               | Brand    | Model No. | Serial No.                   | FCC ID     | Remarks            |

| G  | Laptop                | DELL     | PP32LA    | HSLB32S                      | FCC DoC    | Provided by Lab    |

1. All power cords of the above support units are non-shielded (1.8m).

| ID | Descriptions | Qty. | Length (m) | Shielding (Yes/No) | Cores (Qty.) | Remarks         |
|----|--------------|------|------------|--------------------|--------------|-----------------|
| 1  | VGA Cable    | 1    | 1.8        | Yes                | 2            | Provided by Lab |
| 2  | USB Cable    | 1    | 1.8        | Yes                | 1            | Provided by Lab |
| 3  | USB Cable    | 1    | 1.8        | Yes                | 0            | Provided by Lab |
| 4  | RS-232 Cable | 1    | 1          | Yes                | 0            | Provided by Lab |

Note: The cores are originally attached to the cables.

# 5 Radiated Emissions up to 1 GHz

## 5.1 Limits

Emissions radiated outside of the specified bands, shall be according to the general radiated limits as following:

| Radiated Emissions Limits at 10 meters (dBµV/m) |                                |                   |                   |    |  |  |  |
|---|--------------------------------|-------------------|-------------------|----|--|--|--|
| Frequencies<br>(MHz)                            | FCC 15B / ICES-003,<br>Class A | CISPR 22, Class A | CISPR 22, Class B |    |  |  |  |
| 30-88   | 39                             | 29.5              |                   |    |  |  |  |
| 88-216  | 43.5                           | 33.1              | 40                | 30 |  |  |  |
| 216-230   | 46.4                           | 35.6              |                   |    |  |  |  |
| 230-960   | 40.4                           | 55.0              | 47                | 37 |  |  |  |
| 960-1000  | 49.5                           | 43.5              | 47                | 57 |  |  |  |

|                      | Radiated Emissions Limits at 3 meters (dBµV/m) |                                |                   |                   |  |  |  |  |
|----------------------|--|--------------------------------|-------------------|-------------------|--|--|--|--|
| Frequencies<br>(MHz) | FCC 15B / ICES-003,<br>Class A                 | FCC 15B / ICES-003,<br>Class B | CISPR 22, Class A | CISPR 22, Class B |  |  |  |  |
| 30-88                | 49.5   | 40                             |                   |                   |  |  |  |  |
| 88-216               | 54   | 43.5                           | 50.5              | 40.5              |  |  |  |  |
| 216-230              | 56.9   | 46                             |                   |                   |  |  |  |  |
| 230-960              | 50.9   | 40                             | F7 F              | 47.5              |  |  |  |  |
| 960-1000             | 60   | 54                             | 57.5              | 47.5              |  |  |  |  |

Notes: 1. The lower limit shall apply at the transition frequencies.

2. Emission level  $(dBuV/m) = 20 \log Emission level (uV/m)$ .

3. QP detector shall be applied if not specified.

# Note:

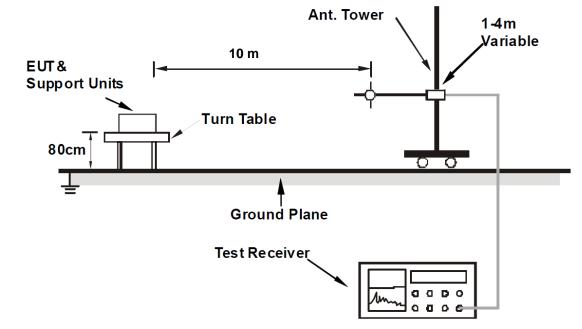

- 1. The calibration interval of the above test instruments are 12 months and the calibrations are traceable to NML/ROC and NIST/USA.
- 2. The test was performed in Chamber F room
- 3. The VCCI Site Registration No. is R-3252.
- 4. The CANADA Site Registration No. is IC 7450H-1.
- 5. Tested Date:Nov. 02, 2017

## 5.3 Test Arrangement

- a. The EUT was placed on the top of a rotating table 0.8 meters above the ground at an accredited test facility. The table was rotated 360 degrees to determine the position of the highest radiation.
- b. The EUT was set 10 meters away from the interference-receiving antenna, which was mounted on the top of a variable-height antenna tower.
- c. The antenna is a broadband antenna, and its height is varied from one meter to four meters above the ground to determine the maximum value of the field strength. Both horizontal and vertical polarizations of the antenna are set to make the measurement.
- d. For each suspected emission, the EUT was arranged to its worst case and then the antenna was tuned to heights from 1 meter to 4 meters and the rotatable table was turned from 0 degrees to 360 degrees to find the maximum reading.
- e. The test-receiver system was set to quasi-peak detect function and specified bandwidth with maximum hold mode when the test frequency is up to 1 GHz.

For the actual test configuration, please refer to the related Item – Photographs of the Test Configuration.

#### 5.4 Supplementary Information

There is not any deviation from the test standards for the test method.

# 5.5 Test Results

| Frequency Range | 30MHz ~ 1GHz         | Detector Function &<br>Resolution<br>Bandwidth | Quasi-Peak (QP), 120kHz |  |  |

| 2  | 146.64  | 20.81 QP                      | 30.00             | -9.19          | 4.00 H                   | 125                        | 33.53                  | -12.72                         |  |
| 3  | 246.89  | 18.30 QP                      | 37.00             | -18.70         | 3.00 H                   | 314                        | 31.87                  | -13.57                         |  |
| 4  | 330.00  | 24.42 QP                      | 37.00             | -12.58         | 4.00 H                   | 219                        | 34.93                  | -10.51                         |  |
| 5  | 366.23  | 20.56 QP                      | 37.00             | -16.44         | 2.00 H                   | 161                        | 30.33                  | -9.77                          |  |
| 6  | 666.42  | 27.02 QP                      | 37.00             | -9.98          | 1.00 H                   | 41                         | 30.38                  | -3.36                          |  |

Remarks:

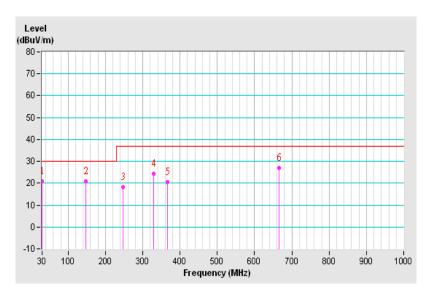

1. Emission Level(dBuV/m) = Raw Value(dBuV) + Correction Factor(dB/m)

2. Correction Factor(dB/m) = Antenna Factor (dB/m) + Cable Factor (dB)

- Pre-Amplifier Factor (dB)

3. The other emission levels were very low against the limit.

4. Margin value = Emission level – Limit value

| Frequency Range | 30MHz ~ 1GHz         | Detector Function &<br>Resolution<br>Bandwidth | Quasi-Peak (QP), 120kHz |  |  |

| 4  | 330.00  | 27.34 QP                      | 37.00             | -9.66          | 1.00 V                   | 129                        | 37.81                  | -10.47                         |  |
| 5  | 366.49  | 25.12 QP                      | 37.00             | -11.88         | 1.00 V                   | 114                        | 34.76                  | -9.64                          |  |
| 6  | 666.13  | 26.15 QP                      | 37.00             | -10.85         | 4.00 V                   | 340                        | 28.88                  | -2.73                          |  |

Remarks:

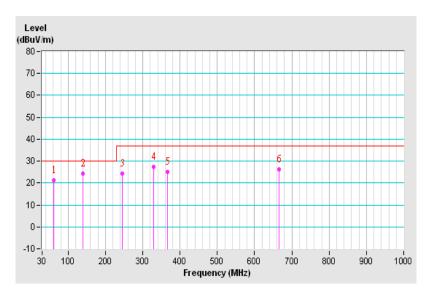

1. Emission Level(dBuV/m) = Raw Value(dBuV) + Correction Factor(dB/m)

2. Correction Factor(dB/m) = Antenna Factor (dB/m) + Cable Factor (dB)

- Pre-Amplifier Factor (dB)

3. The other emission levels were very low against the limit.

4. Margin value = Emission level – Limit value

## 6 Radiated Emissions above 1 GHz

#### 6.1 Limits

Emissions radiated outside of the specified bands, shall be according to the general radiated limits as following:

| Radiated Emissions Limits at 10 meters (dBµV/m)  |            |            |             |             |  |  |  |
|--|------------|------------|-------------|-------------|--|--|--|
| Frequencies<br>(MHz) FCC 15B / ICES-003, FCC 15B / ICES-003, CISPR 22, Class A Class B CISPR 22, Class B |            |            |             |             |  |  |  |
| 1000-3000  | Avg: 49.5  | Avg: 43.5  | Not defined | Not defined |  |  |  |
| Above 3000   | Peak: 69.5 | Peak: 63.5 | Not defined | Not defined |  |  |  |

| Radiated Emissions Limits at 3 meters (dBµV/m) |                                |  |                     |                     |  |  |  |
|--|--------------------------------|--|---------------------|---------------------|--|--|--|
| Frequencies<br>(MHz)                           | FCC 15B / ICES-003,<br>Class A | S-003, FCC 15B / ICES-003, CISPR 22, Class A CISPR 22, Class B |                     |                     |  |  |  |
| 1000-3000                                      | Avg: 60                        | Avg: 54  | Avg: 56<br>Peak: 76 | Avg: 50<br>Peak: 70 |  |  |  |
| Above 3000                                     | Peak: 80                       | Peak: 74   | Avg: 60<br>Peak: 80 | Avg: 54<br>Peak: 74 |  |  |  |

Notes: 1. The lower limit shall apply at the transition frequencies.

- 2. Emission level (dBuV/m) = 20 log Emission level (uV/m).
  - 3. As shown in 15.35(b), for frequencies above 1000MHz, the field strength limits are based on average detector, however, the peak field strength of any emission shall not exceed the maximum permitted average limits, specified above by more than 20dB under any condition of modulation.

Frequency Range (For unintentional radiators)

| Highest frequency generated or used in the device or<br>on which the device operates or tunes (MHz) | Upper frequency of measurement range (MHz)                            |
|---|---|
| Below 1.705   | 30  |
| 1.705-108   | 1000  |
| 108-500   | 2000  |
| 500-1000  | 5000  |
| Above 1000  | 5th harmonic of the highest frequency or 40GHz,<br>whichever is lower |

## 6.2 Test Instruments

#### Note:

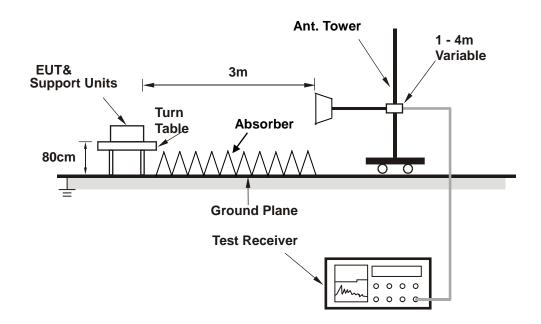

1. The calibration interval of the above test instruments are 12 months and the calibrations are traceable to NML/ROC and NIST/USA.

- 2. The test was performed in Chamber F room
- 3. Tested Date:Nov. 01, 2017

## 6.3 Test Arrangement

- a. The EUT was placed on the top of a rotating table 0.8 meters above the ground at an accredited chamber room. The table was rotated 360 degrees to determine the position of the highest radiation.
- b. The EUT was set 3 meters away from the interference-receiving antenna, which was mounted on the top of a variable-height antenna tower.
- c. The height of antenna can be varied from one meter to four meters, the height of adjustment depends on the EUT height and the antenna 3dB beamwidth both, to detect the maximum value of the field strength. Both horizontal and vertical polarizations of the antenna are set to make the measurement.
- d. For each suspected emission, the EUT was arranged to its worst case and then the antenna was tuned to heights and the rotatable table was turned from 0 degrees to 360 degrees to find the maximum reading.
- e. The spectrum analyzer system was set to peak and average detect function and specified bandwidth with maximum hold mode when the test frequency is above 1 GHz.
- Note: The resolution bandwidth of test receiver/spectrum analyzer is 1MHz and video bandwidth is 3MHz for Peak detection (PK) at frequency above 1GHz. The resolution bandwidth of test receiver/spectrum analyzer is 1 MHz for Average detection (AV) at frequency above 1GHz.

The test arrangement is in accordance with ANSI 63.4:2014. For the actual test configuration, please refer to the related item – Photographs of the Test Configuration.

#### 6.4 Supplementary Information

There is not any deviation from the test standards for the test method

# 6.5 Test Results

Remarks:

1. Emission Level(dBuV/m) = Raw Value(dBuV) + Correction Factor(dB/m)

2. Correction Factor(dB/m) = Antenna Factor (dB/m) + Cable Factor (dB)

- Pre-Amplifier Factor (dB)

- 3. The other emission levels were very low against the limit.
- 4. Margin value = Emission level Limit value

## Appendix – Information on the Testing Laboratories

We, Bureau Veritas Consumer Products Services (H.K.) Ltd., Taoyuan Branch, were founded in 1988 to provide our best service in EMC, Radio, Telecom and Safety consultation. Our laboratories are accredited and approved according to ISO/IEC 17025.

If you have any comments, please feel free to contact us at the following:

Linko EMC/RF Lab Tel: 886-2-26052180 Fax: 886-2-26051924 Hsin Chu EMC/RF/Telecom Lab Tel: 886-3-6668565 Fax: 886-3-6668323

Hwa Ya EMC/RF/Safety Lab Tel: 886-3-3183232 Fax: 886-3-3270892

Email: <u>service.adt@tw.bureauveritas.com</u> Web Site: <u>www.bureauveritas-adt.com</u>

The address and road map of all our labs can be found in our web site also.
