## Know your product

1. Hot keys/Function keys
2. Integrated cradle
3. Rotary dial
4. Bluetooth connection light and OS light
5. Bluetooth connection/OS selection buttons
6. Keyboard
7. Battery compartment door (batteries are pre-installed)
8. Battery status
9. On/off switch

## Setting up the multi-device keyboard

### Setting up your first device

The multi-device keyboard links to your device via a Bluetooth connection. The first time you use the keyboard, you must pair the keyboard with your device.

#### 1. Turn on your keyboard:

The on/off switch is on the back of the keyboard:

#### 2. Select a dial position for your device:

This assigns a preset position to your device.

#### 3. Select your device's OS:

Press the Bluetooth connection button associated with your device for 3 seconds:

Windows/Android:

Mac/iOS:

The light next to the selected button blinks rapidly to indicate the keyboard is discoverable. It remains discoverable for 15 minutes.

**4. Complete Bluetooth pairing on your device.**

Windows 7 and 8 computers:

- a. Go to Control Panel → Devices and Printers.**
- b. Click “Add a device.”** A list of discoverable devices is displayed.
- c. Select “Logitech K480”** from the list.
- d. Click “Next,”** and follow the on-screen instructions.

Mac OS X v10.9 computers:

- a. Go to System Preferences → Keyboard.**
- b. Click “Set up Bluetooth Keyboard...”**  
Your computer starts searching for your keyboard.
- c. When a connection has been established,** “Found Logitech K480” appears on your screen.
- d. Click Continue.**

**Pairing or reassigning to additional devices**

You can pair up to three devices with the multi-device keyboard. You can then switch between devices easily without needing to pair them again.

You can also change the device assigned to a dial position.

Android devices:

- a. In Settings,** under **Wireless and networks** touch **Bluetooth** and then turn on Bluetooth. A list of discoverable devices is displayed.
- b. Choose “Logitech K480”** from “Bluetooth devices”.

iOS devices (Apple iPad or iPhone):

- a. In Settings,** touch **Bluetooth** and then turn on Bluetooth. A list of discoverable devices is displayed.
- b. Choose “Logitech K480”** from the Devices menu.

Note: If your device requests a PIN, enter the code using the multi-device keyboard and not the virtual keyboard on your device.

The light next to the selected Bluetooth connection button illuminates for 5 seconds when the Bluetooth pairing is complete.

The procedure you follow to pair additional devices or reassign a dial position is the same as when pairing your first device.

## Using the multi-device keyboard

### Switching among paired devices

Your paired devices are stored to preset positions on the keyboard. You can quickly switch between the paired devices using the rotary dial.

Note: A maximum of three devices can be stored at a time.

To select a device to use, adjust the rotary dial (on the top-left of the keyboard) to its preset position.

The light next to the Bluetooth connection button associated with your device blinks slowly to show it is connecting. Then it turns solid blue for 5 seconds to confirm that the Bluetooth connection has been made:

Windows/Android: ✱  ✱

Mac/iOS:  ✱

Note: Only one device can be active at a time.

## Status light indicators

### Bluetooth connection light

After selecting the Bluetooth connection button for your device, the light next to the button illuminates.

| Light         | Description  |
|---------------|--|
| Blinking blue | Fast: The keyboard is in discovery mode, ready for pairing.<br>Slow: The keyboard is trying to reconnect to your device. |
| Solid blue    | Bluetooth pairing or reconnection is successful.   |

### Battery status light

The battery status light is next to the on/off switch on the back of the keyboard. It illuminates when keyboard is switched on.

| Light                        | Description                   |
|------------------------------|-------------------------------|
| Solid green                  | Battery power is more than 5% |
| Solid red<br>(At power on)   | Battery power is less than 5% |
| Blinking red<br>(During use) | Battery power is less than 5% |

|  | Home<br>(in text editing) | Select previous word | Home<br>(in text editing) | Select previous word |
|  | End<br>(in text editing)  | Select next word     | End<br>(in text editing)  | Select next word     |
|  | Page up                   | Page up              | Page up                   | Page up              |
|  | Page down                 | Page down            | Page down                 | Page down            |

## Note:

- To select a function key, press and hold the **FN** key, and press the key indicated above.

## Hot key and function key customization

You can customize some hot keys and function keys to perform different actions. Customization is carried out using the Logitech Options app.

The Logitech Options app can be downloaded from [xxx](#).

Notes:

- Hot key and function key customization is only available for Windows and Mac OS X computers.
- As well as customizing the keys, the Logitech Options app can also be used to Configure keyboard notifications, disable specific keys, and carry out further actions.

**\*\*Authors note: awaiting more information on app.\*\***

### Hot keys

You customize the following hot keys:

| Key   | Windows 7 and 8 | Mac OS X                            |
|---|-----------------|-------------------------------------|
|  | —               | Launchpad<br>(OS X v10.7 and later) |
|  | —               | Menu                                |
|  | —               | Back shortcut in Safari             |
|  | —               | Spotlight in Finder                 |
|  | —               | Switch language                     |
|  | —               | Print screen                        |

## Function keys

You customize the following function keys:

| Key   | Windows 7 and 8 | Mac OS X        |
|---|-----------------|-----------------|
|  | Screen lock     | —               |
|  | —               | Brightness up   |
|  | —               | Brightness down |

## Changing the keyboard batteries

Two AAA batteries are pre-installed in the battery compartment before your use.

If the battery status light is red the batteries in the multi-device keyboard need to be replaced.

1. Remove the battery compartment door on the back of the device.

Slide the battery compartment door to the right to access the battery compartment.

2. Replace the batteries.

Remove the old batteries and insert two new AAA batteries.

### Battery information

- The multi-device keyboard is only compatible with AAA batteries.
- When battery charge is low, the status light turns red briefly after the keyboard turns on. The light blinks red until the batteries are replaced.
- When not in use, turn off the keyboard to conserve battery power.

## Visit Product Support

There's more information and support online for your product. Take a moment to visit Product Support to learn more about your new Bluetooth keyboard.

Browse online articles for setup help, usage tips, and information about additional features. If your Bluetooth keyboard has optional software, learn about its benefits and how it can help you customize your product.

Connect with other users in our Community Forums to get advice, ask questions, and share solutions.

## Troubleshooting

### The keyboard does not work

- Press any key to wake the keyboard from sleep mode.
- Turn the keyboard off and then back on.
- Change the keyboard batteries. For more information, see “Changing the keyboard batteries.”
- Verify that Bluetooth is turned on in your device's settings.
- Verify that “Logitech K480” is paired with your device.
- Re-establish Bluetooth connection between the keyboard and your device by selecting “Logitech K480” in the list of **Available devices**. The status light on your keyboard turns solid blue when Bluetooth connection is established.
