Subject: Class II changes to JPZ0034

Identifier: JPZ0034

Equipment class: Part 15 Low Power Transceiver

The changes to JPZ0034 include the addition of RS232, Ethernet and USB ports. Also changed was the outside appearance of the product along with the model number, but both are made from un-shielded plastic. The only difference in critical characteristics is in the spurious emissions. The layout of the PCB was altered to accommodate the different enclosure and addition of communication ports. The model number of the existing product is HR-REP-120 and the new marketed model number will be SZ-CI-PRG.
