**Subject: Class II changes to JPZ0063**

Dear Sir or Madam:

This letter is to explain the Class II permissive changes to FCC id JPZ0063. Being added is SZ-xB where x can be 1-5. The SZ-xB was originally certified under JPZ0055. The new construction of SZ-xB has been changed to have the same RF transceiver chip as the RRD-W3BRL in JPZ0063. With this change the only difference between the RRD-W3BRL and SZ-xB is outward appearance and pwb layout.

Sincerely,

Dan Mitchell  
Senior Engineering Technician
