Columbia MD 21046**

Subject: Model number differences

As required by FCC part 15 we would like to declare the differences between the following model numbers.

The model numbers in question are electrically identical. The front printed circuit boards have different button configurations to support 2 button, 4 button, 5 button, and 6 button models. The only difference is additional buttons.

The difference between the RRT and HQRT model numbers is software. The purpose of the software change is to allow the device to work with our RadioRa2 and Homeworks QS systems respectively.

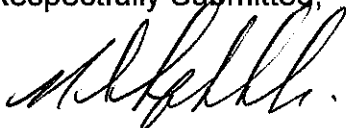

The RF circuitry is identical amongst the models.

Certification no.  
JPZ0114

Model numbers:

RRT-GH2B, RRT-GH4B, RRT-GH5B, RRT-GH6B, HQRT-GH2B, HQRT-GH4B,  
HQRT-GH5B, HQRT-GH6B

Respectfully Submitted,
