

Antenna Specification

Applicable Model Numbers:

SYC-EDU-B-J, QSFC-EDU-B-J

Antenna construction: The antenna is a 7.2 in quarter wave monopole, soldered into a through hole in the printed circuit board. The antenna connection points are permanently attached to the board and cannot be replaced by the user. The antenna can be manipulated by the user but is planned to be held straight in place.

Frequency range capability: 431MHz-437MHz

Peak gain: - 7 dBi
