To whom it may concern:

Regarding model number equivalency of the LED Controller which are model numbered differently for marketing purposes but utilize the same hardware and communication software. All devices are identical in construction and wireless communication aspects but are designed and offered for sale with different Lutron lighting control systems. These different model numbers have unique Product Marketing Names (PMN) and depending on the device utilize different product features which are independent of the device's wireless communication. As all devices are constructed identically testing on the evaluated sample is equivalent for this family certification.

Models (PMN):
CM-X96-X-J1
HW-X96-X-J1

Sincerely Yours,

Daniel J Schlegel
