

Model Difference Letter

For product certification 2851A-JPZ0135 the following Product Marketing Names are present:

RRST-8ANS HRST-8ANS

The device samples submitted for FCC testing were a model number HRST-8ANS. From the RF functionality and performance perspective the submitted samples are also representative of the model number RRST-8ANS.

Models HRST-8ANS and RRST-8ANS feature the identical hardware as well as the RF communication software (PHY) implementation. The two models only differ in the system control portion of the software. The software differences are limited to those allowing the devices to operate in conjunction with different Lutron control systems.
