9292 Jeronimo Road
Irvine, CA 92618-1905 USA

Differences between 1351 ProxPass and 1351 ProxPass II:

- CCA was re-layed out to be smaller in order to make room for a battery compartment.
- The plastic housing parts were changed to fit a battery door and a switch.
- A battery door was added to allow for removable batteries.
- An on/off switch was added to the CCA.
- The battery connections were changed from solder contacts to non-soldered contacts.
- The output tuning was changed to accentuate the USB and reduce the LSB.
