

Appendix A

Non-Conformities for US Radio Equipment Authorization

Non-Conformities FCC ID: JQ6609X (CKC CS Ref # e07-000014-01)

The items listed below represent requests for information following review of this application for certification under United States (FCC) regulations. . Further question may arise pending review of responses to these items.

OK	#	Non-Conformity or Comment	Submitted Response	Respondent / Date of Response
√	1	This statement was found in the user's manual," Note: The cable should have a minimum of four cores (two for power and two for output data). If the reader's input control lines are required, then the cable will need to have extra one or two cores depending on the inputs required." Please explain precisely what these cores are. Are these ferrite cores? If so, where is the part number and manufacturer of these cores? Also, why doesn't the test report show these modifications?	A new user's manual has been uploaded and this statement has been removed. The 2 part statement is in the new manual along with the changes & modifications warning.	Mary Ellen Clayton / 23Mar07
