

1 PREPARING

2 ASSEMBLY AND DISASSEMBLY

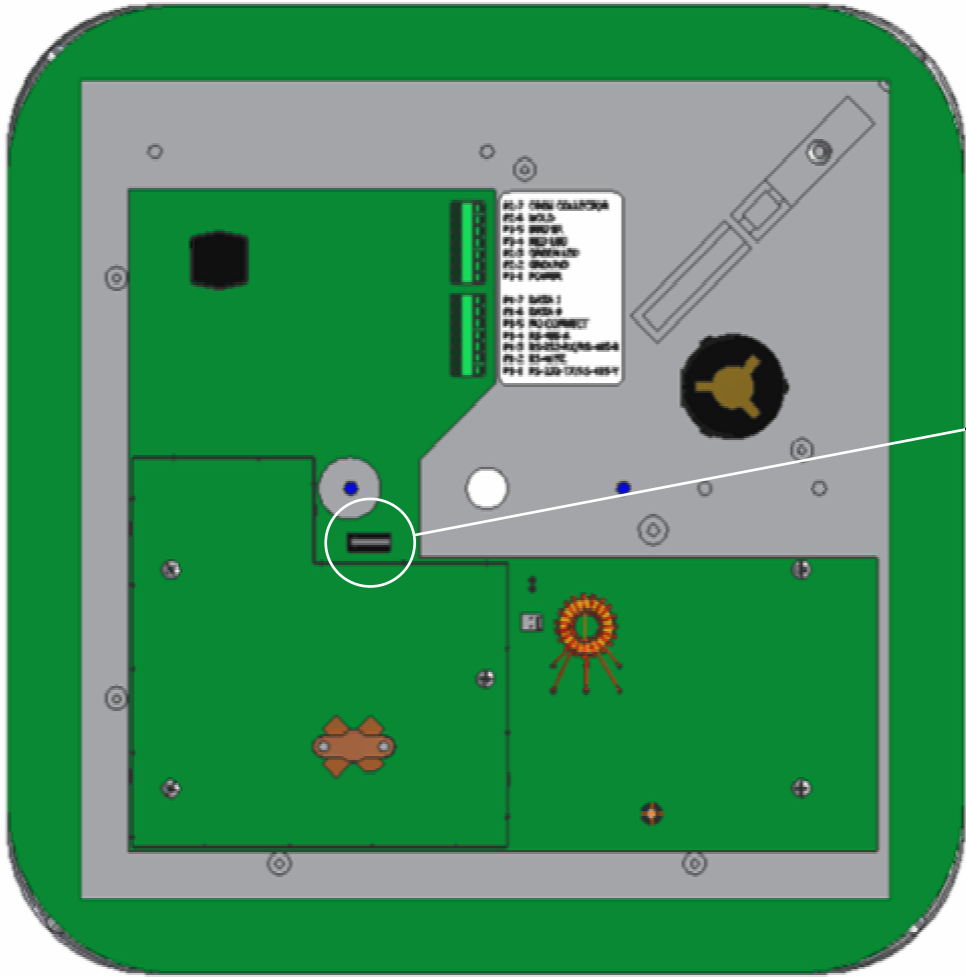

3 TESTING

R90 • Long Range Reader

4 TAMPER SWITCH

An on board tamper switch is wired through the "I'm Alive" feature and if active, the standard supervisory signal will stop if the cover is removed.

5 OPTIONAL FEATURES

- Open Collector Output - controls an external device operating in Host Mode only. See iCLASS Application Note for details.
- Configuration Options - Configure LED, Speaker, and other features. See How To Order Guide or iCLASS Application Note for details.
- Hold Input - when asserted, this line either buffers a card or disables a card read until released, as configured.
