RE: FCC ID: JUP-48480-SNB900\_ATCB001758

Attention: Mark Briggs

I have a few comments on this Application. Please note that further comments may arise in response to answers provided to the questions below.

1. In the frequency hopping algorithm explanation the operational description states, "When it does not have data to send, it outputs nothing." Does this indicate that the transmitter does not transmit on any frequency or does it transmit a CW signal with no data. The later would not be allowed. Please explain.
2. Please provide a sample of the pseudo-random hopping sequence.
3. Please provide the name of the technical contact person on the 731.

Dennis Ward

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
