McLean, Va. 22101

July 24, 2007

Dear Examiner:

I am writing to avoid the possibility of an inadvertent disclosure of proprietary information.

The accompanying Form 731 is being filed with the commission on our behalf by Elliott Laboratories, Inc., a consulting and testing laboratory. Included as exhibits with the enclosed application are block diagrams, schematics, and a detailed description of the theory of operation of the device.

It is our intention to provide the commission with a full disclosure of our product so that its merits can be evaluated. Indeed, we are pleased to provide any further information that the commission might wish to see. It is not our intention, however, to make our proprietary process a matter of public record.

The block diagrams, schematics, and associated theory of operation in our application disclose the mechanism of our process, and contain details of the proprietary operation of our product. These details are not readily discernible - even to technically sophisticated individuals - from our hardware, and constitute trade secrets.

We request, as provided under FCC section 0.459, that these block diagrams, schematics, and theory of operation be segregated from the body of our evaluation report and withheld from public inspection.

Thank you for your attention. Please let the undersigned know if the Commission disagrees with our position or requires further justification.

Sincerely,

A handwritten signature in black ink that reads "Roy Urbach". The signature is fluid and cursive, with the first name "Roy" being particularly prominent.

Roy Urbach
Compliance Engineer
