Dear Application Examiner:

Regarding Part 15 Unlicensed Modular Transmitter Approval, the following requirements called out in FCC Public Notice DA 00-1407 are observed:

1. The 62481-92 has its own RF shielding.
2. The 62481-92 modular transmitter has buffered modulation/data inputs to ensure that the module will comply with Part 15 requirements under conditions of excessive data rates or overmodulation.
3. The 62481-92 employs on-board power supply regulation to the transmitter portion of the module.
4. The 62481-92 employs a reverse-polarity TNC connector and therefore complies with the antenna requirements of 15.203.
5. The 62481-92 was tested in a stand-alone configuration.
6. The 62481-92 has a label with the FCC ID: JUP-6248192
7. The 62481-92 complies with FCC 15.247 for Frequency Hopping Spread Spectrum Operation. An Integration Guide is provided for every module sold. This guide instructs the integrator in the proper operation of the device. The text in the guide specifies FCC Part 15 compliance:
8. The use of the 62481-92 in any application where the antenna is 20 cm or less distance to the body is not allowed. This is specified in the Integration Guide or User Manual.
