Response For FCC Application

2004/9/8

RE: BENQ Corporation

FCC ID: JVP56E05

1. The block diagram is updated. Only 3 Tx bands (900/1800/1900) are allowed.
2. The Label and users manual have been updated to include DoC
3. This device is GPRS class 10, we will update the operational description
4. Has been updated.
5. The SAR testing has no obvious difference for the two batteries except for body-worn keypad down
6. BENQ will delete the FCC logo on charger for the mass production.

Sincerely Yours

Daniel Lee

EMC/SAR Manager
