Response For FCC Application  
2006/3/15

RE: BenQ Corporation  
FCC ID: JVPE61

1. We upload the updated Tune Up procedure, which matches the power in reports.
2. We tested the PC peripheral mode in Part 15B, and having FCC logo on label.  
DoC sheet will be provided in the product package.
3. The RF chipset can support quad-band. However, this device can control output bands as 900/1800/1900 by SAW filter.

Sincerely Yours  
Daniel Lee  
EMC/SAR Director
