Dear Bill,

Please find the responses as below:

1. The RF power for 1900 GSM has been shown in the tune up procedure. Please see page 15 in this document.
2. Please check the attachments. Hot spot 1 (0.138 mW/g) is greater than hot spot 2 (0.13 mW/g). So the cube was measured based on the hot spot 1.
3. uploaded

Thanks a lot.

BR  
Daniel
