

American Telecommunications Certification Body Inc.  
6731 Whittier Ave, McLean, VA 22101

May 15, 2006

RE: BenQ Corporation

FCC ID: JVPS81

I have a few comments on this Application. Depending on your responses, kindly understand there may be additional comments.

- 1.) Please provide a SAR report for this device and upload to the RF Exposure section of this filing at the ATCB website.
- 2.) Please provide the target tune-up power values and the permitted tolerance for this device.
- 3.) It appears that this device can connect to a computer using a USB cable. This means the basic rules apply to this device if used as a "computer peripheral". If the equipment authorization procedures under DofC are used, the label must carry the FCC logo. But if no DofC then an additional Certification to Part 15B is required.
- 4.) FYI: In the future we recommend removing all photographs from the body of the test report completely. If corrections are needed, we have found many errors have occurred when corrections to multiple locations in multiple Exhibits are required. Kindly review your procedures.
- 5.) The agent authorization letter should be addressed to the FCC, not AmericanTCB. Kindly review.

William H. Graff  
President and Director of Engineering

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
