

**Re: Correspondence Reference Number: 25218, 731 CN: EA384636**

Stan,

Answers to your questions:

1.) Submit a FCC test report required by Sections 2.1046 thru 2.1057 of the Commission's R&R. The test report should include the 406.025 MHz data and the 121.5 MHz GMDSS data.

**Answer:** This should be included in the RTCM report chapt 12. If not, please tell me where to find Sections 2.1046 thru 2.1057 so we can give the correct information.

2.) What is the output power, frequency tolerance and the emission designator for GMDSS 121.5 MHz?

**Answer:** output power 20dBm +/- 3dB

frequency tolerance: +/- 10ppm

emission designator for GMDSS 121.5 MHz: 3K20A3X

Please answer directly to me.

Sincerely,

Jotron Electronics as,

Eirik Storjordet
