GSM 900MHz / PCS 1900MHz Dual Band

Caution

Please check and follow simple guidelines below for your safety, and for the proper operation of the phone. Further detailed information is given in the Appendix.

ANTENNA

Use of the antenna not proved by the phone manufacturer can cause severe damage or malfunction to the mobile.

TRAFFIC SAFETY

First check and make sure the traffic regulations related to the wireless phone use. Don't use a hand-held phone while driving a vehicle. Even though using a phone, use it with hands-free kits, and in safety area.

ELECTRONIC DEVICES IN VEHICLE

RF signals may affect improperly installed or inadequately shielded electronic systems in motor vehicles.

HANDS-FREE KITS

Do not install the hands-free kits in the area over the air bag, in the air bag deployment area, or in the area where serious injury could result.

ELECTRONIC DEVICES

RF from wireless phone on operation can interfere the functionality of electronic devices not properly shielded against.

MEDICAL DEVICES

Switch the phone off in hospitals.

Follow any regulations or rules of the hospital.

Switch the phone off to avoid interference with pacemaker, or even other medical devices.

Consult a physician or the manufacturer of the medical device if you have any questions about using the phone in hospital.

PUBLIC PLACE

Do not switch on the phone in the area where wireless phone use is prohibited.

BOARDING AN AIRCRAFT

Switch off your phone before boarding an aircraft.

The use of wireless telephones in an aircraft may be dangerous to the operation of the aircraft.

EXPLOSIVE ATMOSPHERES

Switch off your phone in any area with a potentially explosive atmosphere and obey all signs and instructions.

Do not separate battery from the phone in the potentially explosive atmosphere.

USER GUIDE

Do not allow other person to use your phone without your permission.

When lost the phone or stolen, immediately report to the service provider.

If the phone is not working properly, take it to your nearest qualified service facility.

Use only approved accessories and batteries. Do not connect incompatible products.

RF from the phone can affect to the human body, so avoid longtime exposure to RF as possible.

Remember to make backup copies of important data, such as phonebook, etc.

EXPOSURE TO RADIO WAVES

Your mobile phone is a radio transmitter and receiver. It is designed and manufactured not to exceed the limits or exposure to RF energy recommended by independent scientific organizations through evaluation of scientific studies.

Use only batteries, chargers and accessories approved by the authorized manufacturer not to exceed the recommended exposure guidelines. The use of unauthorized types can not

guarantee the permitted guidelines, and also can not assure the safety of all persons, regardless of age and health.

PROPER USAGE

Use the phone only in its normal operating positions.

Don't touch or bend the antenna unnecessarily while you are calling. It may degrade the call quality and eventually limit the battery's performance.

Do not attempt to open the phone. Non-expert handling may damage it.

Use only the supplied or approved batteries, chargers and accessories with this phone model.

The use of any unauthorized types may invalidate any approval or warranty applying the phone.

Handset Description

* For detail usage of key

Internal LCD(Main LCD)

There are two areas in both LCD displays (Main and Sub). One is for icons to show the status of the mobile phone. The other is to show message, phone number, icons and etc.

<Main LCD Display>

Icons are displayed when specific functions are active or when you have received a message. The figure above shows an overview all possible icons and where they appear.

The table below shows every icons separately and describes the meaning of each icons

	Signal strength	This icon shows radio signal strength. The more bars displayed, the better the signal strength received.
	In use	This icon indicates in- call state.
	Ringing tone	This icon will appear when ring type is 'Ringing tone'.
	Vibration	This icon will appear when ring type is 'Vibration' and in Etiquette mode.
	Vib+Melody	This icon will appear when ring type is 'Vib+Melody'.
	Short message	This icon will blink if SIM message box is full, or appear if unread message exists.
	Alarm	This icon will indicate alarm set
	Roaming	This icon will appear when roaming service is applied.
	Battery	This shows the strength of the battery.

Keys

There are function keys, which have one and more features. Following table shows list of function keys.

Sub-LCD Menu options

Your mobile phone provides extra options for you to select with sub—LCD menu. The following sections describe options in the sub-LCD menu and their functions respectively. There is the ways to access the menu options:

[Normal access]

In standby mode with flip close, press [Vol Down] key to enter the list menu screen. Press [Vol Up]/[Vol Down] keys to browse between the functions in the main screen, then press [Camera] key to select and enter. Select the desired function with [Vol Up][Vol Down] keys and press [Camera] key to confirm.

Press [Vol Down] key for long to return to standby mode.

Recent Call

With this function, you can check recent received call numbers and you can call to the number as well.

- (1). Scroll to “Recent Call” and press [Volume] key.
- (2). Scroll to the recent call number which you want to check and Press [Volume] key to make a phone call. (Calling is possible only with using ear jack)
- (3). Press [Vol Down] key for long to return to standby mode.

SMS InBox

With this function, you can check the received SMS messages.

- (1). Scroll to “SMS InBox” and press [Volume] key.
- (2). Scroll to the message which you want to check and Press [Volume] key.
- (3). Press [Vol Down] key for long to return to standby mode.

Flash ON

You can turn on the camera flash for emergency light .

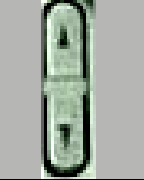

(1). On standby mode, keep pressing [Vol Up] key to turn on the flash

(2). Release the key to turn off the flash.

Function keys

There are function keys, which have one and more features. Following table shows list of function keys.

Function keys

Key Icon	Name	Key Function
	SEND KEY	Press this key to make a call, or answer incoming call (except ANY KEY ANSWER). Press this key long to redial a last call number. Press this key once to retrieve the list of last dialed.
	END KEY	Press this key to end a call, to return to standby state in menu (Cancel, Exit). Long press this key to turn the phone on or off.
	OK KEY	Press this key to enter main menu basically. At each state, special function/menu will be displayed on the screen above this key. Press this key to execute the menu which selected by arrow in the display.(OK)
	MEMU KEY	Press this key to enter menu. At each state, menu will be displayed on the screen above this key.
	CLEAR KEY	Press this key to clear a single letter and long press this key to clear a line. Press this key to return to the previous screen.

	SIDE UP and DOWN KEYS	Press these keys to adjust volume of earpiece up and down in call state.
	CAMERA KEY	Press the key to take pictures of people or events while on the move.

Quick start

Follow steps below for the first time use;

Install the SIM card

When you subscribe to a cellular network, you are provided with a plug-in SIM card loaded with your subscription details (PIN, optional services available and so on).

If necessary, switch off the phone by holding down [END] key until the powering down message is displayed.

1. Remove the battery
2. Check the SIM slot clear, and place the SIM card into slot

3. If you want to remove the SIM card, push it in the direction of the arrow

Install the battery

Insert tabs on the base of the battery into the notches on the base of the phone, as shown bellows:

1. Insert the bottom of battery into the groove at the bottom of the handset.

2. Press in the top of the battery until you hear a click.

Charge the battery

Your phone is powered by a rechargeable Li-ion battery. A travel adapter is provided with your phone. Use only approved batteries and chargers. Ask your local PANTECH dealer for further details.

The phone can be used while the battery is charging

With the battery in position on the phone, connect the lead from the travel adapter to a standard AC wall outlet located in the bottom side of the phone, after opening the cover.

When charging is finished, disconnect the adapter from the power outlet and from the phone.

Getting started

1. Turn on the phone power

Long key press (3 seconds) [END] key to turn the phone power on.

2. Turn off the phone power

Long key press [END] key to turn the phone power off.

3. Make a call

Phone power on by long key press [END] key.

Insert SIM card into SIM slot if "Insert SIM card" message showed.

Enter your PIN1(Maximum up to 8 digits) and to unlock handset(if applicable.)

After the PIN is accepted, network searching is started automatically.

In this idle mode, dial the phone number with area code. Then press [Send] key to make a call. When you'd like to make an international call, press [0] key long until '+' sign appears (alternately press '00'). Then dial national code, area code and telephone numbers those you like. With long press [#] key, you can add 'P' pause symbol for around 2 seconds waiting.

!! Emergency call is available even without available SIM. Dial 112 and press [Send] to make an emergency call.

4. End a call

Press [END] key to end or cancel a call

5. Answer a call

When the phone rings or vibrates, the screen will display the name or the number of the caller (If network supports and you subscribe to it). Display of name is dependent on the data in the Phone book. Press [SEND] key to answer a call in normal answering mode option. With special option [Any key], you could answer a call by pressing any key even side up and down keys except [END] key.

6. Adjust the earpiece volume

When you are speaking with your phone, press the volume adjustment keys on the side of the phone to adjust volume of the earpiece. Seven levels of volume are available for your selection.

7. Browse main menu

Press [Menu] key to enter main menu in standby mode.

Press [End] key to exit menu to standby screen

With navigation keys, [up][left] and [down][right], you can browse among menu items.

To make a decision or answer the question, press [OK] key as YES, or [Clear] key as NO.

8. Type numbers and letters on handset

To enter number, press the number keypad, as you want. To enter letters into handset, you should be into 'T9' mode (e.g. Phone book, Message). Please refer to 'T9' on appendix page

Wrong letter can be erased by pressing [Clear] key. You can erase all characters in a line by long pressing [Clear]. And when continuously pressing, you can erase all character in screen.

Basic call functions

1. Speed Dialing

There are two ways for you to do one-touch dialing while in standby mode:

You can use the 100 records[00-99] saved in the Phone book by long pressing the desired number. For instance, if the number is saved in the Phone book at the location of 5, long press [5] key to initiate the call.

2. Make an international call

Enter the outgoing national code, or press [0] key for about 2 seconds until “+” shows up on the display or double tapping [0] key (00) acts as the same as international call symbol “+”.

3. Make an emergency call

Enter 112 (the emergency number) and press [SEND] key. The call will be sent out. (This 112 number can be used in any country whether a SIM card is available or not, as long as you are included in a GSM network.)

4. Missed call message

If for any reason, an incoming call cannot be answered, a missed call message will appear on the screen to remind you of the call you missed (Network and subscription dependent feature, not available in all areas). To reply to the missed call, first press [MENU] key, then press [Up/Down] key to select the number you want to reply to and press [SEND] key to dial it.

5. Phonebook shortcut

Under standby mode, you can press the [Shortcut to Phonebook '☰'(NAVIGATION DOWN)] key to enter the Phone book and browse the sub menu entries.

6. Last number dialed(received,missed)

Press [SEND] key to access the list of lastest dialed(received,missed) numbers. Press [Up/Down] Key to scroll through the last dialed numbers. Press [SEND] key to send the call if the number shown is correct.

7. Incoming call waiting

(This is the Network and subscription dependent feature. Not available in all areas.)

When a call comes in, you can press [MENU] keys to enter the call options.

[MENU]

1. Answer
2. Reject
3. I am busy

If another call comes in while you are on the phone, you can:

Press [End] key to reject the waiting call.

Press [Send] key to hold on the active call and connect to the waiting call.

8. During call options

When you are on a telephone call, you can press [MENU] keys to enter the call options.

[Menu]

1. Hold
2. End current
3. Mute
4. DTMF on/off
5. Main menu
6. Multiparty
7. End all calls

Each function is described as follows in detail.

Hold - This function allows you to put a currently active call on hold, so that you can initiate a new call.

End current - You can end a current call on one of them by selecting this function.

Mute - When want no sound to be heard by your caller when you are on a call. You can choose the Mute function to do so by selecting this function.

DTMF on/off – This function allows you to turn DTMF tone on/off.

Main menu – You can select the main menus by selecting this functions.

Multiparty

End all calls - Under a circumstance of multi-party call, you can end all calls on one of them by selecting this function.

Menu functions

MENU TYPE

There are two types of Menu in this phone. One is basic menu, and the other is hot folder menu.

To enter the main menu, press one of , , and  Keys.

1. Messages

You can send new messages, and check received messages

1.SMS/EMS

EMS(Enhanced Messaging Service) is sent via SMS (Short Message Service). You can add picture, animation, melody, message and emoticon to a text message, and format the text, using EMS(Enhanced Messaging Service).

Before you start

You must make sure that the number of your service center is set. Usually, The number is supplied by service provider and is saved on the SIM card.

- 1.1 Create
- 1.2 Inbox
- 1.3 Outbox
- 1.4 Settings
- 1.5 Used space

Each function is described as follows in detail.

Create – Used to create a new EMS message to be sent

Inbox– Displays a list of received EMS messages

Outbox – Displays a list of any messages waiting to be sent

Settings – see next " 2. SMS/EMS Sub menu"

Used space – State of SIM records (Capacity, Used records, Unread records)

1.4.1 Message center

1.4.2 Message lifetime

1.4.3 Message format

Each function is described as follows in detail.

Message center - - Allows the address (URL) of the proxy relay or MMSC to be set.

Message lifetime - Controls the lifetime of created messages (1 hour – 6 months)

Message format – (normal, fax, voicemail, ermes, nation'l paging, x.400, internet)

3. Popup menu

When you read the message, received or sent, in the “Inbox” or “Outbox” in Text message menu, you can do the same work such as following popup menu shown:

[MENU]

1. Edit
2. Delete
3. Forward
4. Text Replay
5. Voice call

Each function is described as follows in detail.

Edit - you can edit incoming/outgoing messages.

Delete - you can delete the message.

Forward - you can forward the message with the message.

Text Reply - you can reply the message with the originated number.

Voice call - you can call with the originated number.

Reading Inbox and Outbox messages

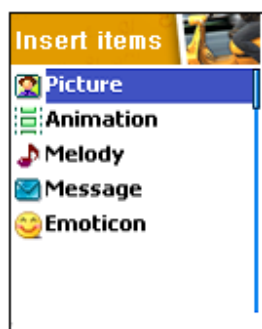

1. Inbox

1. Scroll to “**Inbox**” and press [OK] key.
2. Press [OK] key from the **Inbox** messages.
3. Press [Menu] key.
4. Now, You can select “Edit”, “Delete”, “Forward”, “Text Reply” or “Voice call” as you want.

2. Outbox

1. Scroll to “**Outbox**” and press [OK] key.
2. Press [OK] key from the **Outbox** messages.
3. Press [Menu] key.
4. Now, You can select “Edit”, “Delete”, or “Forward” as you want.

Creating and sending a message

1. Create

Inserting an item in a text message

1. Scroll to “Create” and press [OK] key.
2. While writing your message press [MENU] key.
3. Select “Insert items” and press [OK] key.
4. Now, You can select “Picture”, “Animation”, “Melody”,

“Message” or Emoticon” as you want.

5. And then select “Predefined” or sometimes “Load”

6. Select an item by using [Navigation] key and then press[OK]

There are two options to insert an item.

Predefined – you can load predefined items in the phone. (only displayed if Picture or Message is not being selected)

Load – load form File view or Media box (File system access)

Text style

You can change the text format in a text message.

1. While writing your message press [MENU] key.
2. Select “Text style” and press [OK] key.
3. Select format “Underline”, “Bold” or “Strikeout”.

T9 options

You can find how to edit with this options in appendix page, which explains how to use T9 editor.

2. Sending a text message

1. Scroll to “Create” and press [OK] key.
2. Write your message and press [OK] key.
3. Scroll to “Send” and Press [OK] key.
4. Enter numbers the user, You can also search them from the “phonebook list” through pressing [MENU] key.

3. Saving message

To save a text message (in SIM)

1. After writing your message press [OK] key.
2. Select “Save” and press [Ok] key.

To save a text Archive (in File system)

1. After writing your message press [OK] key.
2. Select “Archive” and press [Ok] key.
3. Select “Save” and press [OK] key.
4. You can save the message in file system.

Receiving a message

When you received a text message, the user will be alerted to the arrival of a message in the convention manner. When the user reads an incoming message the contents are analyzed and displayed on the screen.

To read the text message

Message is saved in "Inbox" in text message menu. Press [OK] to read the text message.

Saving incoming text message

Incoming text messages are saved in the SIM card. When the SIM card is full, you cannot receive messages any more.

In this time, you can see the special icon, which alerts that SIM card is full, in your handset.

When you delete one of your saved messages from your SIM card, then you can receive the message you missed.

To save objects from a text message

If the message text contains embedded components (the picture, animation, melody, message or Emoticon), you can fetch and save them to your phone memory.

While you are reading a message, if a cursor has been moved at the object, then you can select it with [MENU] key and save to the phone (file system).

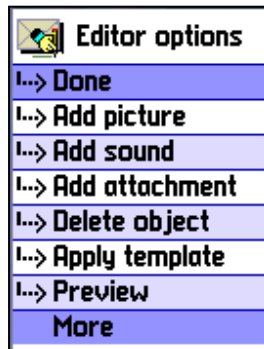

In this case, if what you have selected is a predefined object, then you can not save it, but if it is real data (user defined object), you can do it.

The objects which you saved through the process above can be loaded from the menu, which is <Load>menu from "insert item// Picture/Animation/melody/Message/Emoticon//Predefined/Load".

2.MMS

Creating and Sending a message

A new message is created by accessing the “New message”. The user is presented with a screen showing the first page in a blank MMS message.

The screen displays the page with an informational/status bar above the message showing:

The presence of any sounds or attachments on the current page.

The size of the whole MMS in bytes or kilobytes.

The current page number/total number of pages.

Creating multimedia message

1. In Messages menu, select multimedia *message* -> *New Message* and press [OK] key to select item.

Enter text of message what you wants. For example, “Hello world”.

You can add some objects of multimedia message in any order. – To add an image, press [MENU] key and select *Add picture* -> *Load*. Select a picture file(*.jpg) with the cursor keys

– To add a sound, press [MENU] key and select *Add sound* -> *Load*.

– To add a new page, press [MENU] key and select *Add page*. Then new page will be shown.

If you select *Add image*, *sound*, or *attachment*, a list of items opens. Scroll to the item you

wish to add and press [ok] key. Then, the icon is shown in the top of the screen.

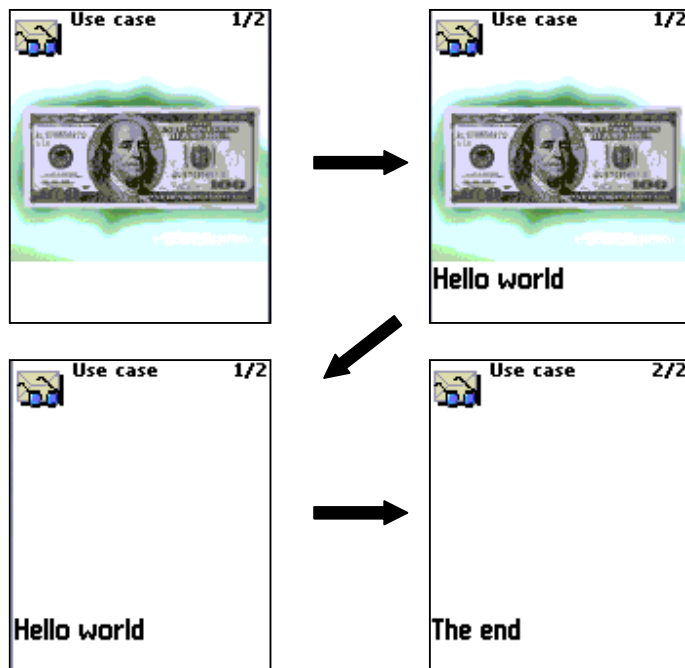

To add a text, Press [MENU] key and select *More -> Object properties* -> select *text files(*.txt)* to add and press [OK] key.

Then, you can see Object Property menu. Now, let's control for how long the current page is shown when read. Select "*Displayed after*" and press

[OK] key. And scroll 4 seconds

To add a new text press [MENU] key and select *Add page* then enter text you want to write.

In this example, "The end".

7. Press [MENU] key and select *Preview* for correction. At the end of correction, press [CANCEL] -> [MENU] key and select *Done*.
8. In the shown Address option menu, move down to the "To:" line and press [OK] key with the "Add address" line selected.
9. When done entering phone number Press [OK] key.
10. Select "Subject" line with [OK] key and write your subject.
11. And select the *Send* or *Send later* line and press [OK] key.

Receiving messages

When the user receives a notification of new message's arrival the following actions will take place:.

1. In Messages menu, select multimedia *message* -> *Inbox* and press [OK] key to select item.

2. On
3. Off
4. Settings

With this function, you can call the voice mailbox provided by your network service provider to listen to the voice mail. You can enter this item by selecting Call and the phone dial the designated voice mailbox number for you automatically.

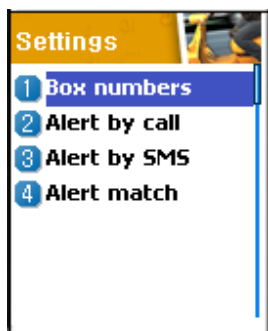

Each function is described as follows in detail.

Call - The Phone makes a call to pre-defined voice mailbox system to get voicemail.

On - The Phone makes a call to set voice mail on

Off - The Phone makes a call to set voice mail off

Voicemail settings – see next “Settings”

Settings

Box numbers - setting the Home Mbox/Roam Mbox/Voice no/Message no/Disable no/Enable no

Alert by call

Alert by SMS

Alert match - When the voicemail comes, it alerts with a specific icon

4.Cell broadcasts [MENU]

1. Read new
2. Read info
3. Settings

You can receive cell broadcast offered by your network service. This function is to set and to read info message(Cell Broadcast)provider, and choose preferring topics and languages.

Each function is described as follows in detail.

Read new

Read info - You can receive the message that Newsflashes and District from offered by network service.

Settings

Language/ Set info subjects

You can choose preferring topics and languages where you are in.

This function is to set Language and information.

- Language

: You can specify the language of info message. The addition of new language and elimination of existing language are possible.

- Set info

: You can specify the topic number of info msg.

Contract network service provider for further information.

- *Create subject* : It will be able to add a new list other than 'Current list'.

- *Current list* : It shows the list, which is stored. It contains new lists. You can select a 'Current list'(maximum two) to receive info message.

2. Call logs

With this function, you can set Received calls, Dialed numbers, Missed calls, Clear logs, Call timers and Call costs.

1) Received calls

This function displays the phone number of the received call. Phone number of received call can operate received time view, phone number store, delete.

2) Dialed calls

This function displays the list of phone number dialed. With menu key, “Call time” and “Add to Pbook” features can be displayed.

3) Missed calls

This function displays the phone number or stored name in SIM of the missed calls. Phone number of missed calls can operate dialed time and date view.

In the case of ‘Received calls’/’Dialed calls’/’Missed calls’

To move to the list you want, you use scroll up/down key, and then press OK key. If there is no information in the list, it pops up the “list empty” message, and return to the previous window in 2 seconds. When you press MENU key, popup-menu shows the list of view call log, add to P-Book, SMS, and delete.

To make a call with the number in the list, move to the list by using scroll up/down key, and then press SEND Key.

To view the log information of a certain number, move to the number by using scroll up/down key, and press OK key. You will

return to the previous list window by pressing one of OK key, CLR key, and END Key.

To store a number in the log into the P-Book, select the number by using scroll up/down key, and press MENU key. Then, POP window shows “add to P-Book” and press OK key.

To send SMS to the number in the list, move to the number by using scroll up/down key, and press MENU key. Then scroll to the “SMS” popup menu, and press OK key. If the number is “withheld”, “no number” pops up for 2 seconds, and then return to the previous list.

To delete a number in the list, scroll to the number and press MENU key. It shows “delete” popup menu, and press OK key.

-> During operation, END key selection goes to the idle screen, and CLE key selection goes to the previous stage. Also MENU key selection pops up some menu lists, however then, if there is no key selection for 10 seconds, the popup menu will disappear.

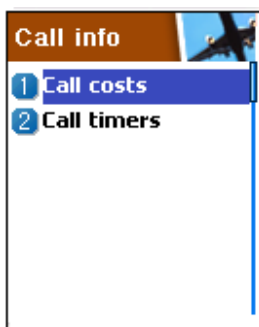

4) Clear logs

This function is to clear Last received, Last dialed, Missed call, Last received logs of call related.

This function has following sub -options to select.

-Last received/Last dialed/Missed call/Last received

5) Call Info

(1) Call costs

This function records the information of the call cost. You can also set the maximum value of cost to avoid overcharge.

[1] Last call

This function displays the cost of the last call with units.

[2] All calls

This function displays the cost of all calls with units. /****You can also clear logs with PIN2 authorization. ****/

[3] Clear logs

This function is to clear all logs of call cost related after you enter PIN1.

[4] Cost units

You can read defined unit or set the unit of cost in service area.

This function has following sub -options to select.

-Read units : You can read of Cost unit.

-Set units : You can set price/Unit and currency of Cost unit.

1. Divert calls

Divert calls – With this options, you can redirect your incoming calls to another number predefined by you. Also you choose a forwarding rule to each service.

1. 1 All calls

Divert all calls – You can redirect all of voice calls, data, fax and messages to another number.

1. 1. 1 On

Select ON to direct all of the services provided by network, voice calls, data, fax, and messages. If you select "On", you should enter a number to which you wish to direct. After entering the number, you should enter a waiting time just before directing a call and press OK to send the configuration to a network.

1. 1. 2 Off

Select OFF to cancel "Divert All Calls".

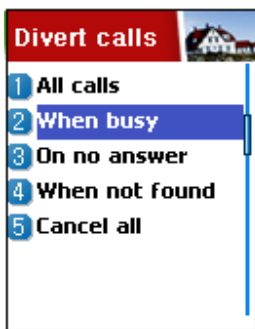

1. 1. 3 Status

STATUS shows the configuration set previously, ON or OFF.

1. 1. 4 By service

You can use your handset to divert a specific type of call to another number if your network supports this feature. You can redirect a call by services. "All services"[1] enables all calls to divert and you can choose one of the services, "Voice calls"[2], "Data"[3], "Fax"[4] or "Messages"[5]. Also choose "All except msgs"[6] to all other services to divert except the messaging service.

1.2 When busy

calls diverted when handset is engaged on another call – When your handset is already connected to a call, you can choose this option to be diverted to another number.

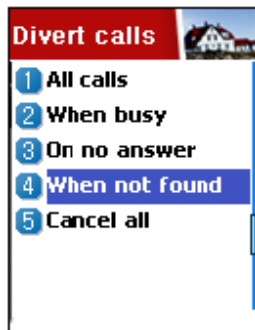

You can set this as shown in 1.1 [Divert All Calls].

1.3 On no answer

calls diverted when handset does not answer – This option allows you to divert the calls to a predefined number. When you cannot answer the phone in 5 seconds to 30 seconds (you should enter this timeout period), the call is diverted.

You can set this as shown in 1.1 [Divert All Calls].

1.4 When not found

calls diverted when handset is out of range – Divert a call (or all call) when your handset is out of the service range.

You can set this as shown in 1.1 [Divert All Calls].

1. 5 Cancel all

Cancel all the diverts you set – You can cancel all the diverts by using this option.

2. Call Settings

Call settings – You can choose one of a number of features for controlling the way in which you make and receive calls.

2. 1 Answer type

Answer type – When a call is incoming to your handset, you can choose the way you start to answer.

2. 1. 1 Flip open

Select “Flip open” to connect a call by opening the flip.

2. 1. 2 Send key

You can connect a call when you press [SEND] key.

2. 1. 3 Any key

Statement according to FCC part 15.19

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC ID: JYCG510

Statement according to FCC part 15.21

Modifications not expressly approved by this company could void the user's authority to operate the equipment.

Statement according to FCC part 15.105

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- . Reorient or relocate the receiving antenna.
- . Increase the separation between the equipment and receiver.
- . Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- . Consult the dealer or an experienced radio/TV technician for help.

RF exposure FCC

Tests for SAR are conducted using standard operating positions specified by the FCC with the phone transmitting at its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified power level, the actual SAR level of the phone while operation can be well below the maximum value. This is because the phone is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the power output.

Before a phone model is available for sale to the public, it must be tested and certified to the FCC that it does not exceed the limit established by the government-adopted requirement for safe exposure. The tests are performed in positions and locations (e.g., at the ear and worn on the body) as required by the FCC for each model. (Body-worn measurements may differ among phone models, depending upon available accessories and FCC requirements). While there may be differences between the SAR levels of various phones and at various positions, they all meet the government requirement for safe exposure.

For body worn operation, to maintain compliance with FCC RF exposure guidelines, use only accessories that contain no metallic components and provide a separation distance of 15mm

(0.6 inches) to the body. Use of other accessories may violate FCC RF exposure guidelines and should be avoided.

Health and Safety Information FCC

Exposure to Radio Frequency (RF) Signals

Your wireless phone is a radio transmitter and receiver. It is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission of the U.S. Government. These limits are part of comprehensive guidelines and establish permitted levels of RF energy for the general population. The guidelines are based on the safety standards previously set by both U.S. and international standards bodies:

This EUT has been shown to be capable of compliance for localized specific absorption rate (SAR) for uncontrolled environment/general population exposure limits specified in ANSI/IEEE Std. C95.1-1992 and had been tested in accordance with the measurement procedures specified in FCC/OET Bulletin 65 Supplement C (2001) and IEEE Std. 1528-200X (Draft 6.5, January 2002).

Ministry of Health (Canada), Safety Code 6. The standards include a substantial safety margin designed to assure the safety of all persons, regardless of age and health. The exposure standard for wireless mobile phones employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6W/kg *.

* In the U.S. and Canada, the SAR limit for mobile phones used by the public is 1.6 watts/kg (W/kg) averaged over one gram of tissue. The standard incorporates a substantial margin of safety to give additional protection for the public and to account for any variations in.
